Full product description

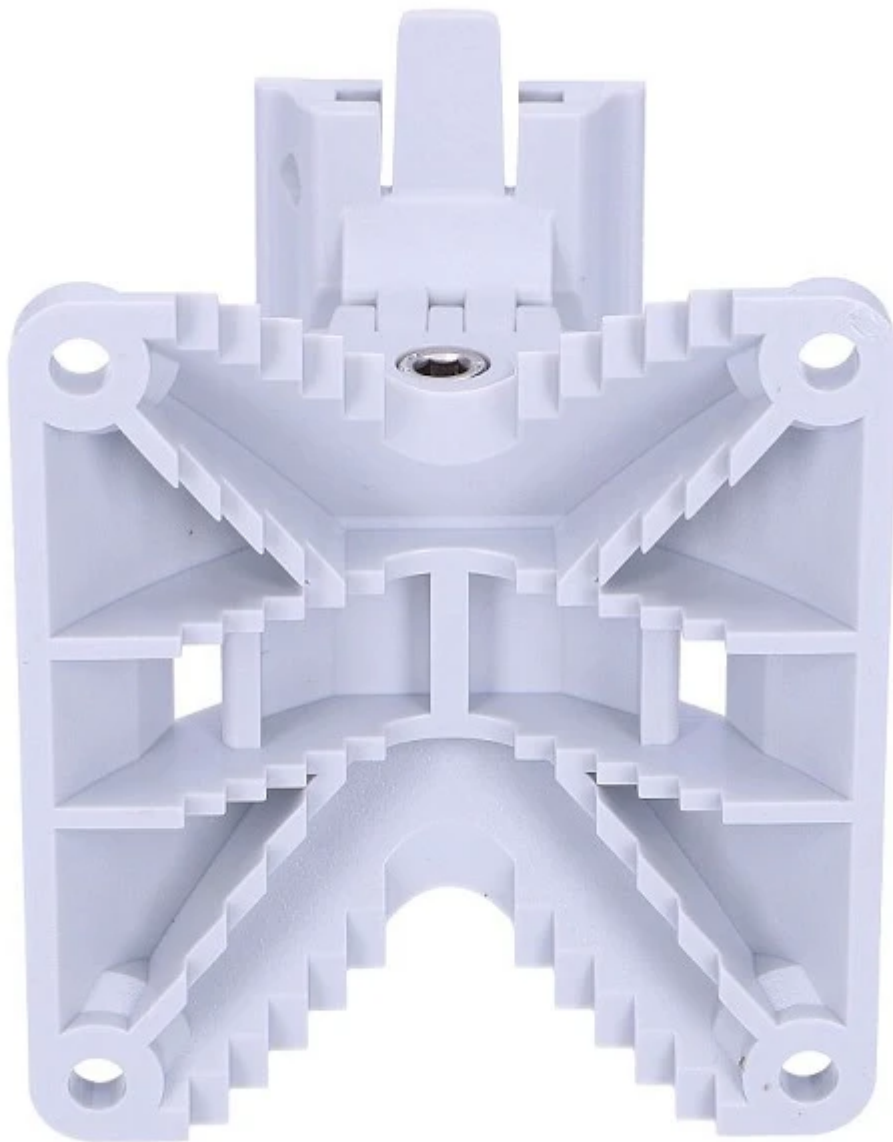

MicroTik quickMOUNT pro | Mounting bracket for mounting directional or sector antennas

The offered holder is an advanced product for wall mounting to a point to point and sector antenna. It can also be used as an adapter from a large diameter pole to a small antenna mounting clip, providing a reliable mount. We will be happy to help you choose your network equipment and provide technical support. In our shop we offer wireless routers, access points, sfp modules, temperature sensors, smoke detectors, motion detectors, access controllers, power strips, power banks, antenna brackets, cpe client devices, fiber optic welders, ip cameras, media converters, fiber optic cables, monitoring kits, network cards, alarm systems racks and cabinet accessories, mounting accessories and other accessories. You will also find other network devices here. Ask a question - we are there for you.

Features:

- supports SXT, Omnitik, BaseBox and many other devices;
- easy to assemble
- made of durable material - anvilNITE
- dimensions: 95x88x112 mm
- maximum weight of the antenna: 1.5 kg
- the angle of rotation: 140°

Application Mikrotik Quickmount Pro

The bracket allows to rotate the antenna within 140° both horizontally and vertically. With QuickMOUNT pro it is possible to perfectly align the antenna with the integrated scale with a scale. The bracket can be used with any pole or pole mounting device or with a small Mikrotik mounting clip weighing less than 1.5 kg.
