Price: **122.20 zł** gross / 99.35 zł net

Manufacturer: MIKROTIK

Referention number: DNXHIOSKEIN

### Product features

|                             |                   |
|-----------------------------|-------------------|
| Height                      | 13 mm             |
| Connector(s)                | 2x MMCX           |
| LED indicators              | Yes               |
| Width                       | 51 mm             |
| Depth                       | 30 mm             |
| Connectivity technology     | Wireless          |
| Chipset                     | AR9580            |
| Storage temperature (T-T)   | -5 to 65 °C       |
| Interface                   | RF Wireless       |
| Networking standards        | IEEE 802.11a      |
| Operating temperature (T-T) | -30 to 65 °C      |
| Wi-Fi standards             | 802.11a           |
| Wi-Fi                       | Yes               |
| Top Wi-Fi standard          | Wi-Fi 4 (802.11n) |
| Product colour              | Black             |
| Host interface              | Mini PCI Express  |
| Internal                    | Yes               |

### Full product description

#### MicroTik R11e-5HnD

High power wireless card 4920-5920MHz 802.11a/n dual channel wireless card in miniPCI-e format. Perfectly fits to new RB912 series, RB800

## Connection status in the LED

The card has built-in LED indicators for wireless mode, connection status (connected, searched, disabled), TX and RX activity and wireless signal strength - just looking at the card will help with installation and tuning.
