Full product description

Exceptional LTE Card - MikroTik R11eL-EC200A-EU

The **MikroTik R11eL-EC200A-EU** is a state-of-the-art **LTE card** that provides reliable and high-speed connectivity across various network standards. Equipped with a **miniPCle connector**, it is compatible with most **MikroTik** devices that have this type of connector, making it a universal solution for many users.

Support for 2G, 3G and 4G Networks

This **LTE module** supports 2G, 3G and 4G (LTE) networks, offering a maximum throughput of **150 Mbps** (downlink) and **50 Mbps** (uplink). As a result, users can enjoy smooth **streaming**, fast downloads and stable connectivity under various network conditions.

Adapted for EMEA/APAC/Australia Regions

The **MikroTik R11eL-EC200A-EU** modem has been designed specifically for the **EMEA, APAC and Australian** regions, including Poland. It supports the popular **B28** band, which guarantees wide compatibility and performance in these areas. It is ideal for both businesses and individual users.
