Full product description

MikroTik R11eL-FG621-EA - Revolutionary LTE Module for Professionals

MikroTik R11eL-FG621-EA is an advanced **LTE** module equipped with a miniPCIe connector, ideally suited for most **MikroTik** devices (except for RB800 and RB4011 models). It provides the reliability and high performance you expect from **MikroTik** products. With support for **3G and 4G (LTE)** networks, this module allows you to enjoy a fast and stable Internet connection.

Highest Bandwidth and Aggregation

With Category 6 LTE support, the **MikroTik R11eL-FG621-EA** offers an impressive maximum throughput of **300 Mbps downlink and 50 Mbps** uplink. The carrier aggregation function allows simultaneous use of multiple bands, which significantly improves performance and connection stability. The maximum channel width of 20 MHz ensures fast data transfer, making this module ideal for demanding users.

Range and Compatibility

The modem was designed specifically for the **EMEA/APAC/Australia** regions, including Poland. It supports popular frequencies, including the **B28** band, which guarantees wide compatibility with local networks. This makes it a versatile tool for a variety of applications, from urban data centers to remote locations.

Ease of Integration and Use

MikroTik R11eL-FG621-EA has two **uFL** connectors for connecting an external antenna. Choosing the right antenna is crucial - it should support the frequencies of the bands that are most commonly used in your area. This will ensure maximum performance and connection range.
