Full product description

MikroTik RB4011 wall mount kit

Mikrotik WMK4011 is a simple solution to mount Mikrotik Routerboard RB4011 in public places to avoid accidental disconnection of cables. Made of durable steel, the mount attaches to the wall and allows to connect Ethernet cables before the router is mounted inside. This means that after securing the device there is no easy way to disconnect the cable or move the device.

Wall-mounting kit RB4011

Fits to the devices RouterBoard RB4011iGS+RM and RouterBoard RB4011iGS+5HacQ2HnD-IN.
