Price: **613.43 zł** gross / 498.72 zł net

Manufacturer: MIKROTIK

Referention number: DNXJLSKEHQ

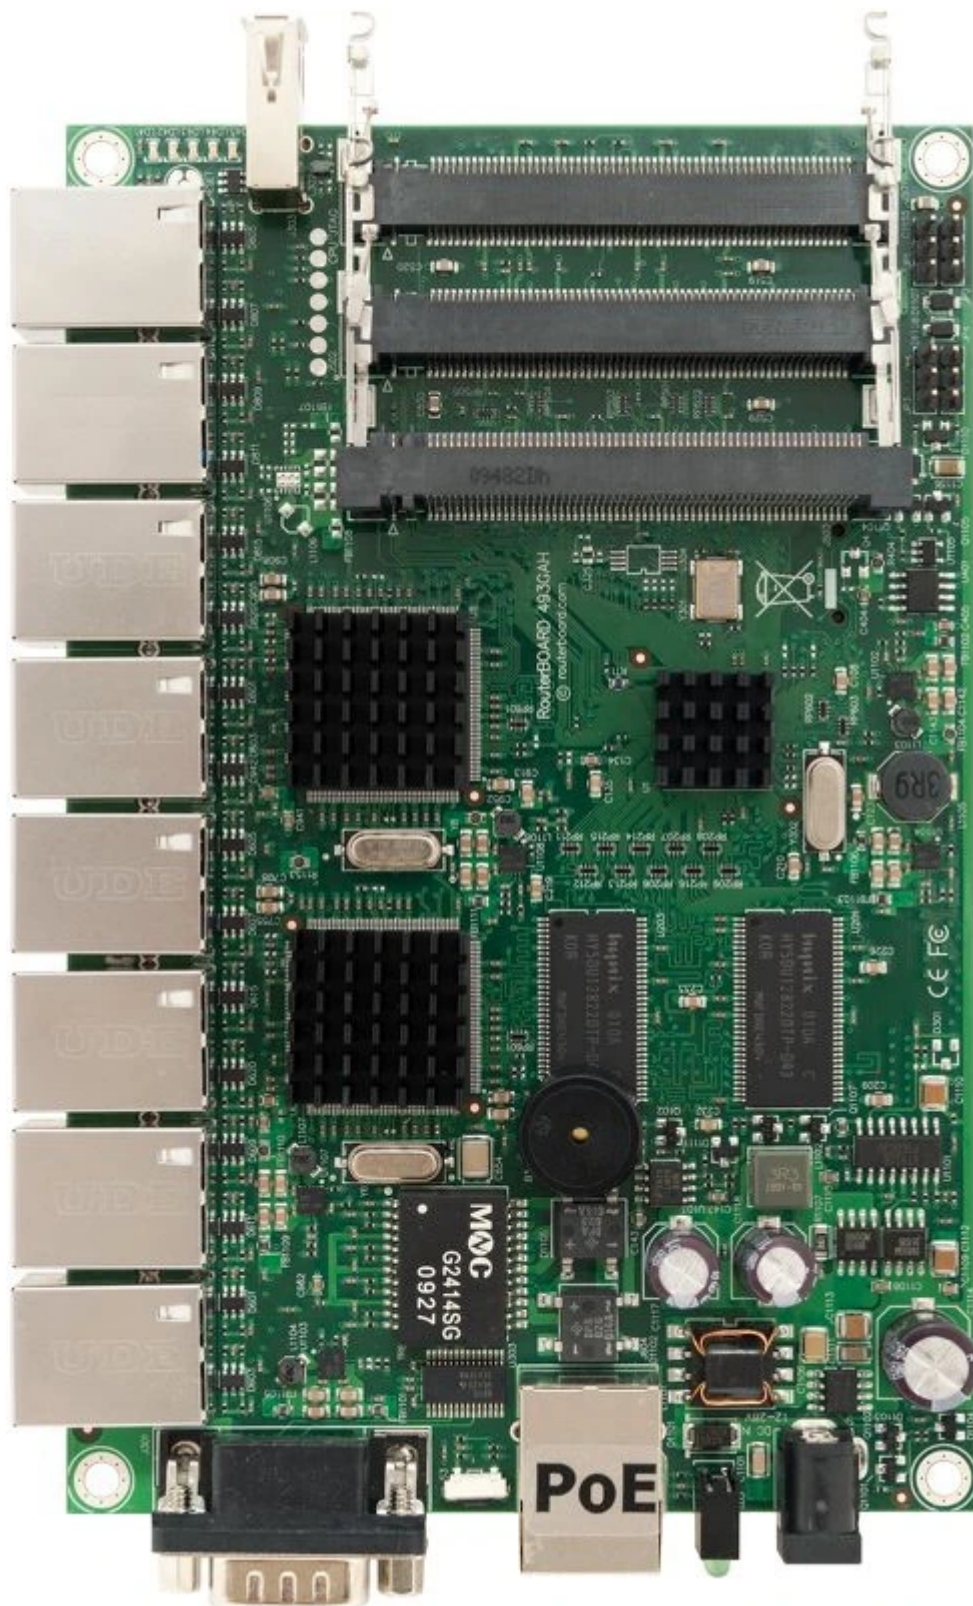

Information:

MikroTik RB493G is a high-performance router with 9 gigabit Ethernet ports, 3 miniPCI slots and two switching chips, which allow the ports to be divided into two switch groups for better link throughput. It also offers a USB 2.0 port and a microSD slot, enabling memory expansion or connection of a backup 3G USB modem. Thanks to the Atheros AR7161 processor and 256 MB RAM, the device delivers high performance, and the RouterOS system allows it to be used as an advanced router, firewall or bandwidth manager.

Full product description

Large number of ports

RB493G has **nine Gigabit Ethernet ports**, **three miniPCI** sockets and **two switching circuits**, so the Ethernet ports can be combined into two groups of switches to provide bandwidth. RB493G also has a **USB 2.0** port and **microSD** card slot for adding more storage or **3G USB 3G** for backup connection.

High performance of the device

The device has a powerful **Atheros AR7161** processor and has **256 MB of built-in RAM**. RB493G contains **RouterOS** - an operating system that will turn this powerful system into a highly advanced router, firewall or bandwidth manager.
