Information:

MikroTik RBGESP is a gigabit surge protector for Ethernet networks, designed to protect installations against the effects of lightning strikes and power surges. It supports PoE, so it can operate in networks with power transmitted over the cable. The set includes an outdoor enclosure and a special grounding cable, which makes safe installation and effective protection of network equipment easier.

Full product description

MicroTik RBGESP surge protection

RBGESP is a Gigabit Ethernet Surge Protector that can be used to protect the network against lightning or surge damage. It comes with an external enclosure and a special grounding cable. The device is equipped with a Gigabit Ethernet port with PoE power support.
