Price: **118.17 zł** gross / 96.07 zł net

Manufacturer: MIKROTIK

Referention number: DNXGFNJOMRMMOM

Product features

Transmission distance (max)	80 km
Harmonized System (HS) code	85176990
Operating temperature (T-T)	-40 - 85 °C
SFP module slots quantity	1
Wavelength	1550 nm

Full product description

SFP module S-55DLC80D with two LC ports

MikroTik S-55DLC80D is a single-mode SFP insert designed for data transmission at **1.25 Gbps**. It has two LC/UPC connectors. Transmission is carried out on both channels of the module through single-mode optical fibers on 1550 nm wavelength. The single-mode SFP module enables data transmission over a distance **up to 80 km**. The SFP module S-55DLC80D operates in the temperature range from -40°C to 70°C.

Special features:

- 1.25 Gbps transmission speed
- Range 80 km
- Wavelength 1550 nm
- 2 LC ports
- Single-mode fiber optic operation
- DDM support
- Operating temperature from -40°C to 70°C
