

MikroTik Sleeve30 | Radome cover | dedicated for mANT30

link to the product:

<https://www.batna24.com/gb/p/wi-fi-lte-antennas/mikrotik-sleeve30-radome-cover-dedicated-for-mant30>

Price: **512.26 zł** gross / 416.47 zł net

Manufacturer: MIKROTIK

Referention number: DNXEKOHQHRMMMM

Product features

Height	220 mm
Width	700 mm
Depth	700 mm
Package weight	5520 g
Compatibility	Mikrotik mANT30
Package depth	715 mm
Package height	230 mm
Package width	720 mm
Product colour	White
Watch case material	Aluminium
Product weight	2950 g

Full product description

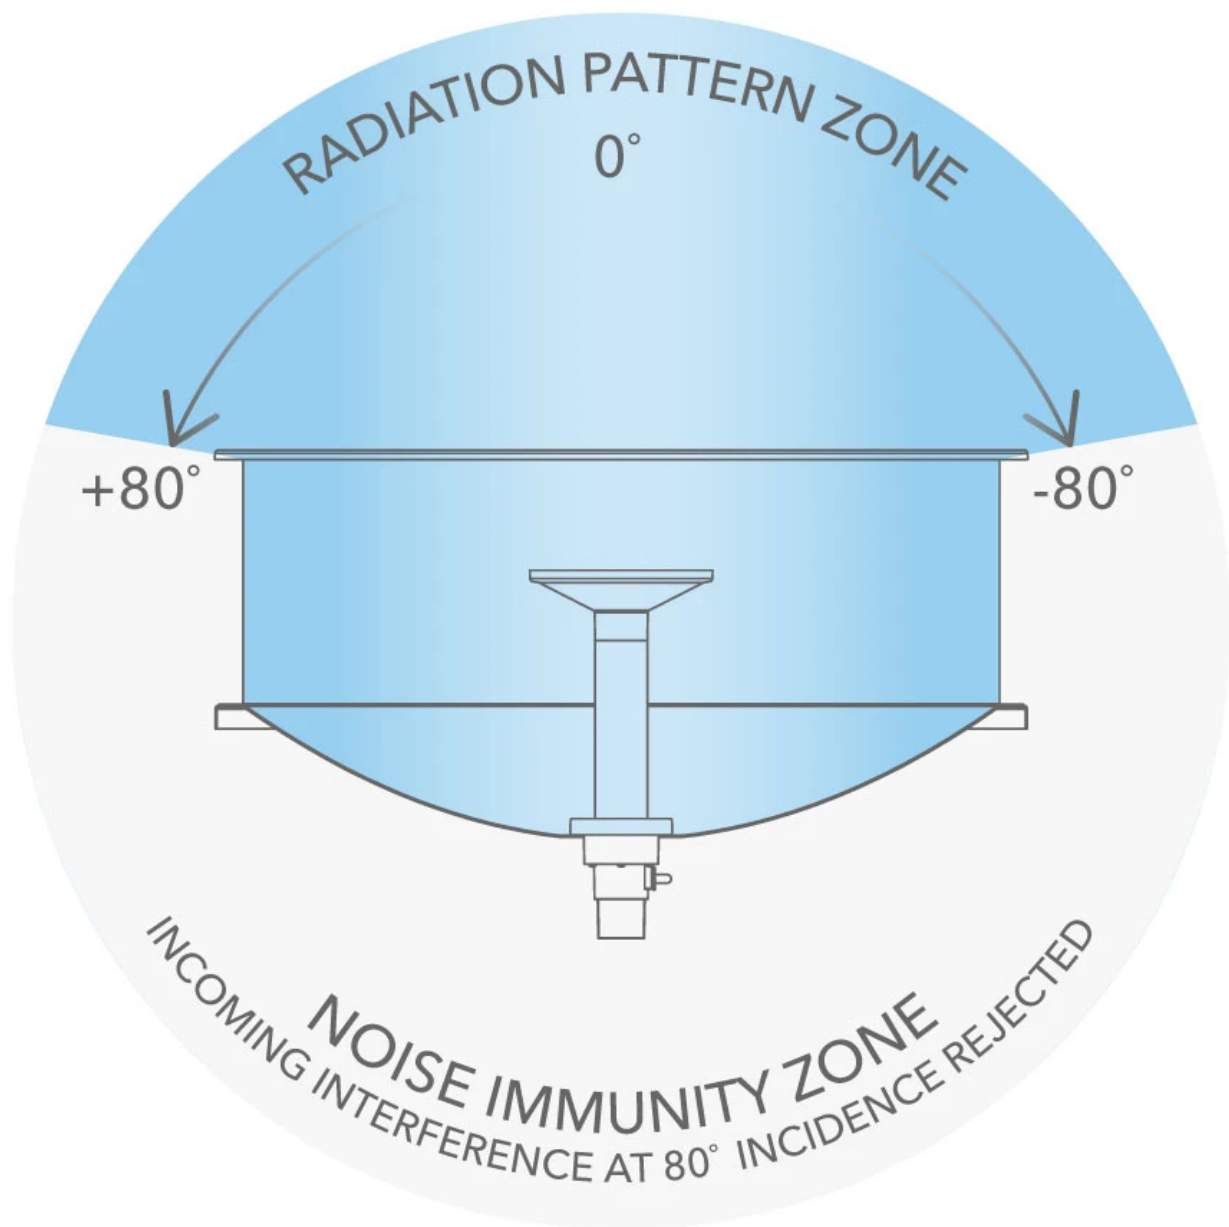

MicroTik Sleeve30

The Sleeve30 kit for our parabolic mANT30 antenna will increase the efficiency of the point-to-point connection by reducing noise and also reduce the impact on adjacent radio equipment by removing side radiation from the antenna.

Sleeve30 with mANT30

Additional and co-channel interference creates unwanted attenuation of the signal, which causes a decrease in quality and speed of the link. Using Sleeve30 set with mANT30 gives 22dB of additional selectivity for each mANT30 in a critical direction. Using Sleeve30 Kits for two mANT30 devices next to each other provides additional selectivity of 44dB.

A solution that removes mutual interference

This improvement allows several mANT30 + Sleeve30's to work freely in one place, on the same channels, without interfering with each other. Sleeve30's also reduces wind load and protects the antenna reflector and connector from adverse environmental influences, improving PtP link durability. Sleeve30 is made of corrosion-resistant, lightweight aluminum; the front cover has excellent radio signal transparency.
