### Full product description

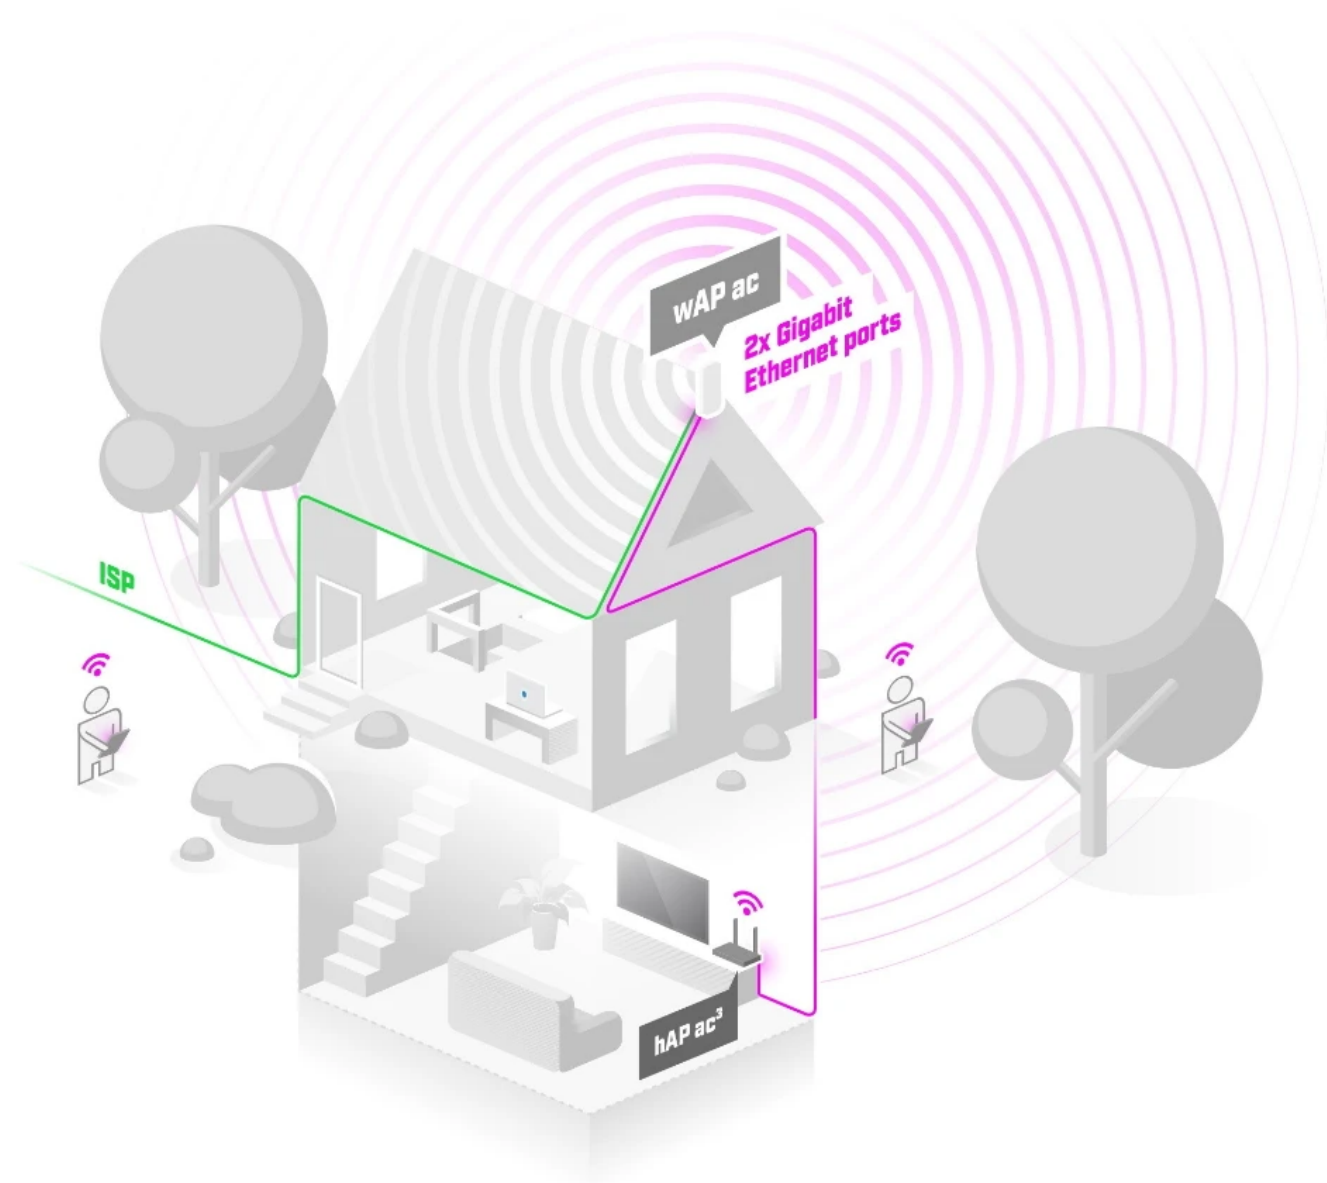

#### MikroTik RBwAPG 5HacD2HnD Access Point - outdoor WiFi hotspot

MikroTik RBwAPG 5HacD2HnD is a dual band access point with improved weatherproofing. The Access Point has 2 Gigabit Ethernet ports, a powerful processor, more RAM and improved wireless antenna power. The Access Point is now available in 2 colors.

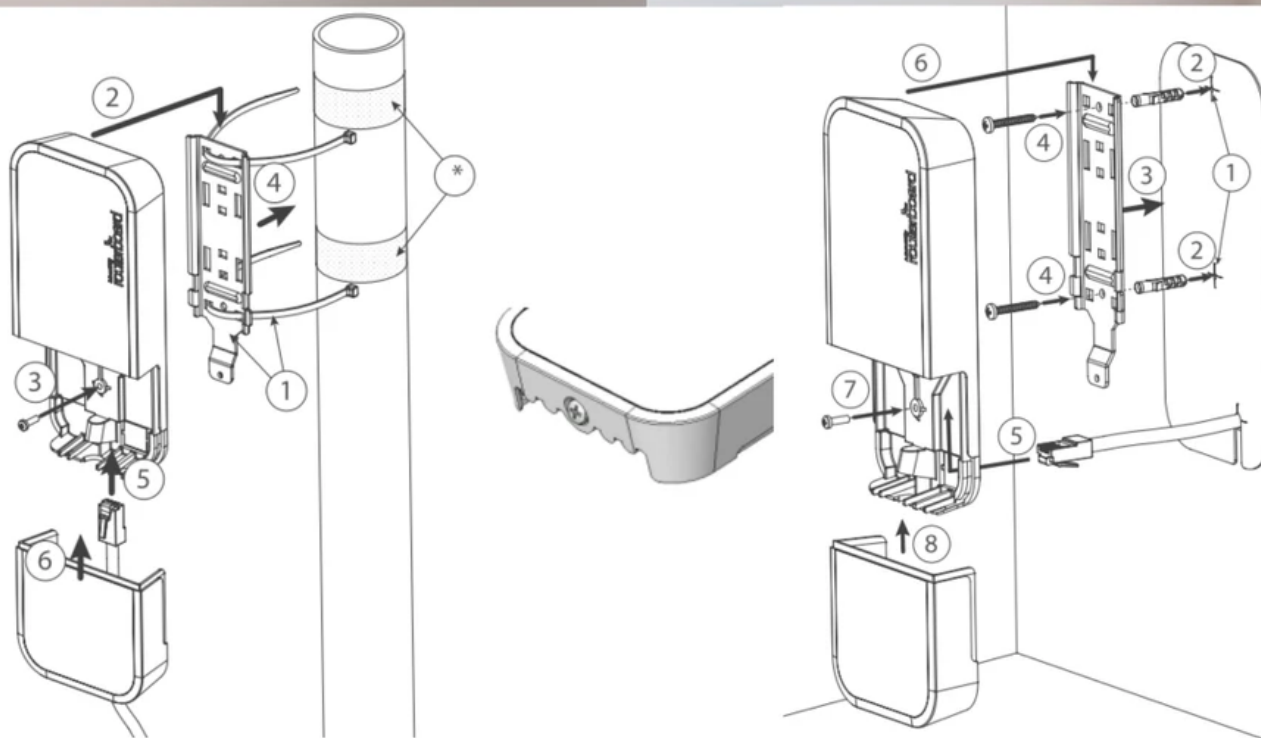

## Wireless and wired networking capabilities

The access point operates in 2 bands: 2.4/5 GHz, which will solve most interference problems in crowded areas. You can use the 2.4GHz channel for older devices and the 5GHz channel for other devices, as this frequency is less congested. The second Gigabit Ethernet port allows you to connect more devices and thus expand your WiFi network.

## Easy to fix

MikroTik wAP ac can be very conveniently attached to a mast, as well as on walls and ceilings. All cables are hidden, which does not spoil the view from outside. For protection, a vandal-proof housing that can only be opened by the owner.

## Key features:

- Operating temperature: -40°C to 70°C
- Number of processor cores 4
- 128 MB RAM
- Wireless Network 2.4 GHz (802.11b/g/n) and 5 GHz (802.11a/n/ac) wireless network
