Full product description

Mimosa Gigabit PoE Injector (24V) is the perfect solution for anyone who needs a stable and efficient PoE power supply!

With support for 24V 0.5A power and the ability to transfer data at Gigabit Ethernet speeds, this PoE injector guarantees the reliability and performance you expect from top-quality networking equipment.

Efficient PoE power supply

The Mimosa Gigabit PoE Injector provides a stable 24V 0.5A power supply, which is ideal for a variety of network devices such as access points, IP cameras and other PoE devices. So you can be sure that your **devices will operate continuously and efficiently.**

High-speed data transfer

With Gigabit Ethernet support, this PoE injector provides fast and stable data transfer. It is the perfect solution for networks that require high bandwidth and low latency, providing optimal performance for your network applications.

Easy installation and use

The Mimosa Gigabit PoE Injector is easy to install and use, making it an ideal choice for professionals and less advanced users alike. Simply connect the device to the network and to the target device to enjoy instant power and data transfer.
