Manufacturer: MOMCOZY

Referention number: DNXGGOPPIRMNHH

Information:

Momcozy BM01 is a baby monitor with a Full HD 1080P camera and a large 5-inch screen, providing a clear view of your baby day and night thanks to night vision. The camera's 350° horizontal and 90° vertical rotation, together with 2x/4x zoom, lets you monitor the entire room without blind spots. The device works without Wi-Fi, which increases security and privacy, while a stable range of up to approx. 292 m gives you freedom to move around the house. The 5000 mAh battery ensures long operating time, and the set includes the camera, monitor, mounting bracket and accessories.

Recommended gender	Boy/Girl
Built-in display	Yes

Full product description

Momcozy 1080P BM01 electronic nanny - full control and peace of mind for the parent

Baby safety is every parent's priority, and the **Momcozy BM01** electronic nanny allows you to monitor your toddler in **full HD 1080P** quality. With a large 5-inch screen, **a wide 360° field of view** and night vision, you can rest assured that your little one is in constant care - even at night. With long battery life, no need for a Wi-Fi connection and intrusion resistance, the device provides **a secure and stable connection**.

Full HD 1080P image - clear viewing at any time

It's important to see every detail - **the Full HD 1080P camera** provides clear images both during the day and at night. With night vision, you can monitor your baby even in the dark, without distractions or blurs. The **2x and 4x zoom** allows you to get a closer look at your baby without having to go to the crib.

Wide field of view - see the whole room

You don't have to worry about blind spots - the camera **rotates 350° horizontally and 90° vertically**, allowing you to cover the entire room with one device. Thanks to the infinitely adjustable viewing angle, you can easily control what is happening in your child's room. It's a **practical solution** that ensures you won't miss any important situation.

Security and privacy - no Wi-Fi connection

Not every device should be connected to a network - **Momcozy BM01 works without Wi-Fi**, eliminating the risk of hacking and unauthorized access. A stable **connection with a range of up to 960 feet** (about 292 m) in open space ensures reliable video transmission. So you can be sure that the nanny video is only available to you.

Long working time - 5000 mAh battery

The built-in 5000 mAh battery ensures that the monitor can run for a long time, so you don't have to constantly plug it in to charge. Thanks to its energy-saving mode, the monitor can run for **hours without interruption**, keeping you in constant view of your baby throughout the night. **Two power cables** allow you to conveniently charge both the camera and the monitor.
