Manufacturer: MOMCOZY

Referention number: DNKGJOLJRMMLK

Information:

Momcozy ErgoWrap™ is a functional postpartum belt designed to support the body's recovery after childbirth, stabilise the figure and make it easier to return to everyday activity. The Ergonest Support Structure 3D technology adapts to the body's curves, providing effective abdominal compression, support for the rectus muscles, the lumbar region and the pelvis, as well as relieving pressure on the back. The soft, breathable and skin-friendly material increases wearing comfort, while the seamless finish ensures the belt remains discreet under clothing. This model is particularly recommended after a caesarean section and during postpartum rehabilitation.

Full product description

Functional Momcozy ErgoWrap postpartum belt - support for recovery and body stabilisation

Postpartum belt Momcozy ErgoWrap™ is a functional item supporting a woman's body after pregnancy has ended. This **postpartum abdominal belt** was created to stabilise the body and make it easier to return to activity during the demanding **postpartum period**. Thanks to its thoughtful design, the product helps **support** the natural tissue contraction process, making it a practical choice for women after the event that was **childbirth**. The nude-coloured model remains discreet, offering suitable **comfort** throughout the day.

Pierwsze w branży opatentowane wsparcie dla pleców

Momcozy belts and Ergonest Support Structure technology

The **Momcozy ErgoWrap™** model uses the innovative Ergonest Support Structure, which precisely adapts to the body's natural curves. The use of **3D** technology allows stabilisation of the **lower abdomen**, which is crucial when **recovery** of tissues is taking place. The **Momcozy ErgoWrap belt** is **made from soft, skin-friendly and breathable material**, which helps prevent irritation. This structure makes **Momcozy belts** stable while not causing unnecessary pressure on sensitive areas, which increases **wearing comfort**.

Recovery of the rectus abdominis muscles and back

The appropriate **compression** offered by the **momcozy ergowrap postpartum belt** supports **recovery of the rectus abdominis muscles** and the uterus returning to its original position. The product stabilises the **back**, which helps **relieve pain** in the **lower back** resulting from weakened muscles after pregnancy. The **Momcozy ErgoWrap has been designed** to support the **postnatal rehabilitation** process, especially when a **caesarean section** was necessary. The stable **abdominal belt provides** protection for the wound area and supports the **deep muscles** and **abdominal muscles** during movement and childcare.

Discreet under clothing and comfortable to use

The designers made sure that the **belly wrap** is almost invisible under everyday **clothing**. The seamless construction means that wearing the belt does not restrict freedom of movement, even during **breastfeeding**. The **Momcozy brand** offers a range of **solutions such as an abdominal slimming belt**, which is not **too tight** and at the same time effectively helps in the process of **getting back in shape**. Before starting to use **abdominal wraps**, it is worth remembering an important rule: **consult your doctor** to make sure your body is ready for this stage of **recovery**, which will help shorten the **recovery time**.

Pelvic stabilisation and durability of Momcozy solutions

At Momcozy we want to give mums a sense of confidence, which is why the **postpartum abdominal belt** also stabilises the area of the **pelvis**. The **abdominal belt provides** durability even with intensive use, which is important in the **postpartum recovery** process. Please note that damage resulting from improper cleaning of **Momcozy products is excluded** from warranty claims. **Momcozy offers** proven **solutions such as a slimming belt**, which help **support muscle recovery** in a safe way. Although the **maternity belt provides** support before delivery, the **ErgoWrap** model is dedicated exclusively to care after the baby is born.
