Full product description

Relief and comfort for nursing moms

Momcozy LM01 is a **2-in-1 warming lactation massager** that helps relieve breast pain and promote natural milk flow. With **2 modes and 6 intensity levels**, you can customize the massage to your needs, getting effective relief from puffy breasts and clogged ducts. **The IPX7 waterproof** rating allows you to use the massager in the shower or bath, further supporting muscle relaxation and improving comfort.

Relieves pain and facilitates milk flow

During the first few days of lactation , breasts can be **tense, painful and sensitive**, making it difficult to feed your baby. The Momcozy massager **softens the breast before feeding**, helping the baby get a better grip and making pumping easier. Regular use can **reduce the risk of milk stagnation**, which prevents inflammation.

Two modes and six levels of intensity

The massager offers **two massage modes**: warming and vibrating, which can be adjusted to individual preferences. Each mode has **six levels of intensity**, allowing you to choose **a gentle relaxing massage or a stronger stimulation of the milk flow**. This makes the massager suitable for both daily feedings and situations requiring faster unblocking of the ducts.

Safe, waterproof and quiet

The **IPX7** rating means the device is completely waterproof, so it can be used in the shower. **The silent mode of operation (≤ 50 dB)** makes the massager discreet and does not disturb the baby or household members. **Safe materials and ergonomic design** make the device fit well on the breast for comfortable use.

Magnetic charging and long operating time

The Momcozy LM01 massager has **a built-in 800 mAh battery** that allows for 90 minutes of use on a full charge. Magnetic charging provides convenience and eliminates the need for cables. A full **charge lasts about 3 hours**, allowing the device to be used multiple times before the next charge.

Contents of the kit

- 2 lactation massagers
- 2 magnetic USB chargers
- 1 storage bag
- 1 instruction manual
