Full product description

Momcozy M6 Double Red breast pump - convenient and effective milk extraction

Momcozy M6 Double breast pump is a solution that allows you to **express milk from both breasts** at the same time, saving time and increasing efficiency. With **high-quality materials**, **9 levels of suction intensity** and **quiet operation**, using the breast pump is comfortable and discreet. The perfect fit to the breast collar and **the ease of cleaning** make it a product that will meet the expectations of any mother.

Double milk extraction

Momcozy M6 Double breast pump allows you to **express milk from both breasts at the same time**, which reduces the time needed for the whole process. Thanks to double operation, the device is **more efficient**, and you gain more time for rest or other duties. Such functionality makes the breast pump ideal for **everyday use**, both at home and on the go.

Adjustable suction level and modes

The breast pump offers **9 levels of suction intensity** and **3 modes**, allowing you to tailor the device to your needs. By choosing between **stimulation, expression** and **mixed** modes, you can control the rate and strength of suction for greater comfort. **The maximum suction force is 300 mmHg**, allowing you to express breastmilk quickly and effectively.

An infographic with a pink background. On the left, a cutaway view of the breast pump's internal motor is shown, with a blue glow and a rocket ship icon above it. A speech bubble points to the motor with the text '2nd Gen Motor'. To the right, the text 'Strong Suction, Efficient Pumping' is displayed next to a gold shield icon with a checkmark. Below this, three circular icons represent the pump's features: a fan icon for '295 mmhg Suction', a control panel icon for '3 Modes', and a '9' icon for '9 Levels'.

2nd Gen Motor

Silence and discretion

The breast pump operates with a noise level of less than **50 dB**, which means that it is **very quiet** and will not disturb your home. This type of discreet operation means that you can use the breast pump without worrying about waking up your baby or disturbing other household

members. Quiet operation is also ensured by **an innovative design** that minimizes sounds during suctioning.

Long working time and fast charging

The **1350 mAh** battery allows **180 minutes of operation** on a single charge, which is equivalent to about 5-6 sessions of pumping milk. The charging time is only 150 minutes, so the breast pump is ready to use in a short time. In addition, the average **battery life is 300 cycles**, which ensures long-term use of the device.

Contents of the kit
