Full product description

Momcozy MW01 - fast and convenient heating of milk

The **Momcozy MW01 bottle warmer** allows you to quickly heat up milk in as little as 2-5 minutes, making feeding your baby more convenient, especially at night. In addition, the functions of defrosting, **reheating food and keeping it warm for 24 hours** make this practical device easier to take care of your little one every day.

Quickly heat up milk and food

You don't have to wait long for your milk to reach the right temperature - **Momcozy MW01 heats it in 2-5 minutes**, saving you time. Thanks to precise temperature control, the milk does not overheat, which preserves its nutritional value. **The ability to heat solid food** also makes the device useful for expanding your baby's diet.

Compatible with most bottles and materials

The warmer fits all brands of bottles, so you don't have to worry about the fit. The wider material fit allows you to heat both plastic and glass containers. You can also easily use it to heat breast milk bags.

Defrost and keep warm for 24 hours

If you're storing breastmilk in the freezer, **the defrost function** will help you prepare milk or baby food safely and evenly. **The keep warm mode** keeps your milk at the right temperature for **24 hours**, so you always have it ready to serve. This is a convenient solution especially during night feedings.

Safe and easy to use

Operation of the device is **intuitive** - just pour the water, set the temperature and insert the bottle. **The memory function** remembers the last settings, making it easy to use again. **An automatic shut-off** increases safety, preventing overheating and saving energy.

Contents of the kit

- **One infant bottle warmer**
- **One measuring cup**
- **One bottle basket**
- ** No bottles or milk bags included.*
