momcozy

Manufacturer: MOMCOZY

Referention number: DNXXGOONLRMNL

Information:

The Momcozy electric nail file is a safe and convenient solution for caring for the nails of babies and the whole family. Thanks to the adjustable speed, touch-and-stop function and gentle operation at low speed, it minimises the risk of irritation and injury. Quiet operation below 35 dB means it can be used even while a child is sleeping, and the built-in 360° LED light makes precise use easier. The rechargeable battery with USB-C charging provides convenience without the need to replace batteries, and the set includes 4 attachments for babies and 3 for adults.

Full product description

Safe and gentle nail care for babies - convenience for the whole family

Trimming babies' nails can be a challenge, but with the **Momcozy electric nail file** this task becomes quick, convenient and, above all, safe. The device has been **designed with delicate children's nails in mind**, offering adjustable speeds, a touch-and-stop function and quiet operation. Thanks to the **built-in rechargeable battery and USB-C charging**, you do not have to worry about replacing batteries – it is a practical solution for parents who care about their child's comfort.

Built-in rechargeable battery - convenient USB-C charging

Momcozy Electric Nail File has a built-in rechargeable battery, eliminating the need for constant battery replacement. Charging via a USB-C cable means the device is always ready to use, and one charge is enough for many care sessions. Compared with traditional clippers, the file is **easier to use and gentler on a child's nails**.

Suitable for the whole family - 4 attachments for children, 3 for adults

The file is equipped with **4 soft attachments for babies** and **3 nail-care attachments for adults**, making it suitable for the whole family. Adjustable grinding speeds allow you to tailor the operation to the age and sensitivity of the nails - from newborns to adults. It is a **versatile device** that makes nail care easier for everyone at home.

Safe for babies - touch-and-stop function

Trimming babies' nails requires **precision and care** – that is why the file can operate at the lowest speed (3500 RPM), minimising the risk of skin irritation. The touch-and-stop function means the file stops the moment it accidentally touches the skin, which **prevents injuries to the child's fingers**.

Quiet operation and gentle LED lighting

The file generates **noise below 35 dB**, so it will not wake the child during grooming – it can even be used while the little one is asleep. The **built-in 360° LED light** provides better visibility of the nails, eliminating the problem of poor lighting, while being **gentle on the child's eyes**.

Set contents

- 1 electric nail file
- 4 attachments for babies
- 3 attachments for adults
- 1 USB-C charging cable
- 1 user manual
