**momcozy**

Manufacturer: MOMCOZY

Referention number: DNKGJOILDRMLPQ

### Information:

The Momcozy maternity belt is a discreet and comfortable support for expectant mothers, helping to lift the bump, relieve the lumbar spine and reduce pressure on the pelvis and ligaments. The ergonomic Ergonest Support Structure stabilises the body and supports correct posture while walking, standing or working. The soft, skin-friendly, seamless material ensures wearing comfort, while the ventilation holes improve breathability. The wide adjustment range and quick self-adhesive fastening make it easy to fit as the bump grows. The beige colour makes the belt almost invisible under clothing.

### Full product description

## Momcozy maternity belt - functional support for the abdomen and relief for the spine

**The maternity belt** by **Momcozy** is a practical solution designed for women who need stabilisation and relief for their figure during pregnancy. Using a **belly band** design, the product helps lift the abdomen during everyday activities, walks or work, which translates into greater **comfort** in daily life. The **Momcozy maternity belt** in beige is well suited to light-coloured clothing, providing discreet support at every stage of pregnancy.

### Construction and Ergonest Support Structure technology

The product's construction is based on advanced 3D shaping and the Ergonest Support Structure. This technology has been ergonomically designed to stabilise the abdomen and lower back, helping to reduce back muscle fatigue. The material used to make this **maternity belt** is **soft** and skin-friendly, which minimises the risk of irritation. This **seamless** model has been developed to **support more gently** sensitive body areas, while maintaining the durability needed for regular wear of many supporting **belts**.

## Innowacyjna technologia komfortu

### Proper relief for the lower back

The main task of lumbosacral **belts** is to transfer the weight of the growing abdomen, which helps ease pressure on the pelvis. The **Momcozy maternity belt** stabilises the spine in its **lower section**, which is helpful for muscle tension and ligament pain. Regular **wearing of the belt** helps maintain proper posture, which is especially important when standing or walking for long periods. Thanks to its wide adjustment range, the **abdominal band** adapts to changing body shapes, providing stable support for a long time.

## Breathable material and discretion under clothing

The practical, **seamless** cut means the **band** remains almost invisible under fitted **clothing**. The material has special ventilation holes that allow the skin to **breathe** freely, preventing overheating during a busy day. The fastening system uses a simple self-gripping closure, where the hooks attach directly to the fabric surface, ensuring a secure hold. As a result, **wearing the belt** is functional both at home and at work, and its construction does not restrict movement under **clothing**.

### Quick fastening mechanism and simple circumference adjustment

This model is equipped with a functional self-gripping fastening system, allowing the product to be put on and taken off in an instant. The fastening hooks attach directly to the suede-like surface of the material, ensuring a secure hold without the risk of accidental unfastening. This design means the **maternity belt** grows with the growing abdomen, allowing precise adjustment of pressure. The system is also very practical during frequent toilet visits, enabling the **band** to be unfastened and refastened in just a few seconds.

## Key benefits

- Stable support for the spine and abdomen thanks to the ergonomic Ergonest structure.
- **Soft** and skin-friendly material providing high **thermal comfort**.
- Special ventilation holes allowing the skin to **breathe** freely.
- Construction invisible under **clothing** thanks to the seamless finish and flat edges.
- Simple adjustment allowing the **maternity belt** to be adapted to the growing abdomen.
- Help in reducing pressure on the pelvis and ligaments while walking or standing.

## The product is ideal for

- Pregnant women experiencing discomfort in the **lower back** and lumbar area.
- Expectant mothers looking for discreet body stabilisation under fitted **clothing**.
- People needing posture support during standing work or long walks.
- Users who value a **seamless** design and highly breathable materials.
- Women looking for functional **belts** that make movement easier in advanced pregnancy.
