Manufacturer: MOMCOZY

Referention number: DNXXGGOPOLRMNIQ

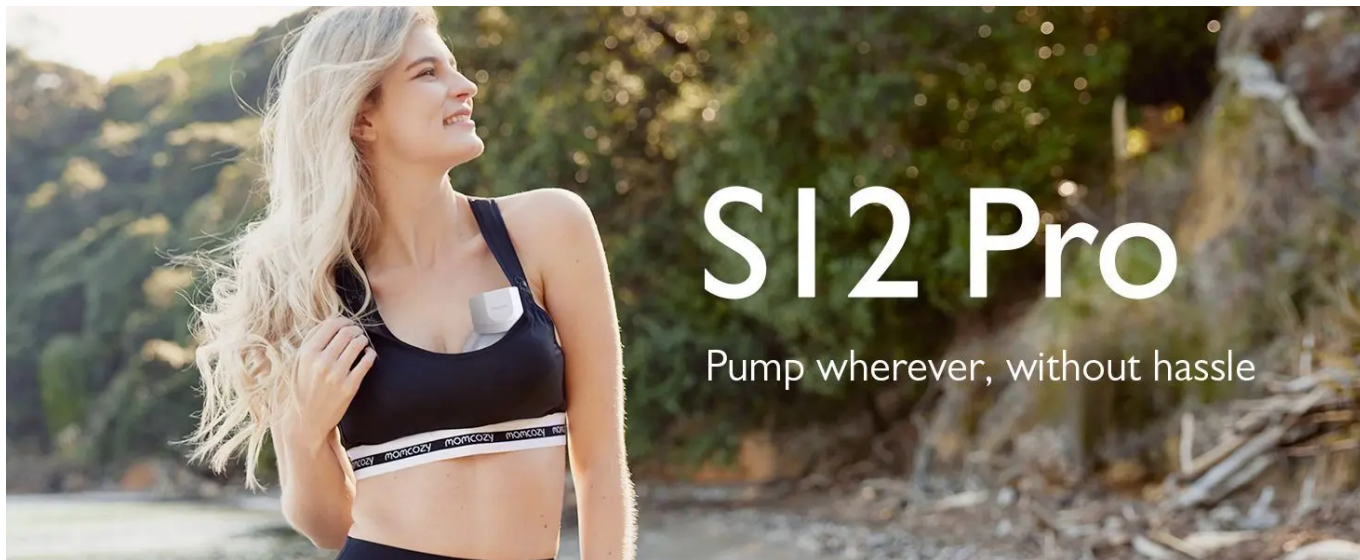

Information:

Momcozy S12 Pro is a wireless, quiet electric breast pump that provides convenient and discreet milk expression at home and on the go. The dual pumping system shortens session time, and operation below 50 dB means the device can be used even at night. The double-sealed silicone flange improves comfort and reduces leaks, while the available 24 mm and 27 mm sizes make fitting easier. 3 operating modes and 9 intensity levels allow personalised suction settings, with a maximum suction strength of 270 mmHg. The 1200 mAh battery provides up to 140 minutes of use, USB-C charging is quick and convenient, and the LED display makes it easy to monitor settings.

Full product description

Comfortable milk expression - wherever you are

Momcozy S12 Pro is a **wireless and quiet breast pump** that makes everyday breastfeeding easier, providing freedom of movement and ease of use. Thanks to the **double pumping system**, it shortens session time, allowing for faster and more efficient milk expression. The **quiet operating mode** (below 50 dB) means it can be used even at night without disturbing the baby's or household members' sleep.

Double-sealed flange - even greater comfort

The breast pump is equipped with a **double-sealed silicone flange**, which ensures a better fit and minimises leaks. The standard size is **24 mm**, but **27 mm** is also available, allowing for a better fit to different breast shapes. As a result, **milk expression is more efficient and comfortable**, without the need to frequently adjust the device's position.

3 operating modes and 9 intensity levels

Every mother can tailor expression to her needs by choosing from 3 modes: **stimulation, expression and mixed mode**. Each mode has 9 adjustable suction levels, allowing the suction strength to be adapted to individual preferences. The maximum **suction power is 270 mmHg**, ensuring efficient milk expression without discomfort.

Long usage time - less charging, more freedom

The Momcozy S12 Pro breast pump is equipped with a **1200 mAh battery**, which allows for **up to 140 minutes of operation** or **5-6 full expression sessions** on a single charge. Charging time is approximately **1.5 hours**, and thanks to the USB-C port it can be charged anywhere. Automatic shut-off after 30 minutes prevents overheating and saves energy.

Clear LED display - full control over expression

The device has a **clear LED display** that shows usage time, battery charge level and the currently selected operating mode. This gives you **full control over the expression process**, and the breast pump is simple and intuitive to use.

Set contents

- 24 mm flange × 2
- Silicone membrane × 2
- Pump motor × 2
