momcozy

Manufacturer: MOMCOZY

Referention number: DNXXGGOPOMRMNJP

Information:

Momcozy S12 Pro is a wireless, single breast pump designed for mums who value convenience, discretion and efficiency. It offers 9 intensity levels and 3 operating modes: stimulation, expression and mixed mode, while the maximum suction strength of 270 mmHg supports effective milk extraction. Quiet operation below 50 dB means it can also be used while the baby is sleeping. The built-in 1200 mAh battery provides 5-6 sessions on a single charge, and fast USB-C charging takes about 1.5 hours. Its compact design, LED display, safe BPA-free food-grade silicone and easy cleaning make it a practical everyday choice.

Easy to apply	Yes
Display type	LED
Product colour	Translucent
Capacity	180 ml
Built-in display	Yes
Type	Electronic

Full product description

Momcozy S12 Pro Single White breast pump - freedom and convenience for every mom.

Breastfeeding is a special time, but you don't always have the opportunity to be with your baby at all times. **The Momcozy S12 Pro breast pump** is designed to provide convenience, discretion and efficiency in pumping. **Its cordless design, quiet operation and long battery life** mean you can use it anywhere without interrupting your daily routine.

Matching mom's needs

The **Momcozy S12 Pro** breast pump offers **9 intensity levels** and **3 modes: stimulation, pumping and mixed**. This allows you to adjust the suction force to your preference, ensuring comfort and efficiency during each session. With a **maximum suction force of 270 mmHg**, the breast pump draws milk efficiently, minimizing wastage.

Quiet and discreet operation

Thanks to sound attenuation technology, the breast pump works **quieter than 50 dB**, which means you can use it even when your baby is sleeping. **With no wires and a small size**, you can easily wear it in your bra and use it in any situation. **The LED display** allows you to easily control the settings, battery level and usage time.

Long working time and fast charging

The built-in **1200 mAh battery** provides **5-6 pumping sessions** on a single charge. **It takes only 1.5 hours to charge via USB-C**, and the automatic shut-off after **30 minutes** prevents overheating and makes it safer to use. It's great for moms who need a mobile and easy-to-use breast pump.

Safe materials and easy care

All parts that come into contact with breastmilk are made of **safe food-grade silicone, free of BPA**. The design of the breast pump **has minimized the number of parts**, making it easy to clean and maintain hygiene. It also comes with **a cleaning brush and milk storage bags**, making taking care of the device even easier.
