Full product description

Momcozy V1 Touchless Breast Pump - Hospital Grade.

With modern technology and advanced features, **the Momcozy V1 breast pump** is a device that provides **complete convenience and efficiency** in the process of expressing milk. Designed for moms who are looking for **a non-contact solution**, the breast pump enables efficient and comfortable pumping without direct contact with the breast. With its customizable design, it offers **complete control over the intensity of the suction**, ensuring comfort at every feeding moment.

Professional and efficient pumping

The **Momcozy V1 breast pump** offers **9 levels of suction** and **3 modes: stimulation, expression and mixed**, allowing you to adjust the strength of the suction to suit your individual needs. Thanks to this adjustment, the breast pump provides fast and effective pumping of milk in comfort. **The maximum suction force is 270 mmHg**, which guarantees optimal results with minimal effort.

Touchless solution for greater convenience

The **Momcozy V1 breast pump** allows you to express milk without direct contact with the breast, which reduces pressure on the breast and **increases comfort**. This solution is especially useful when **prolonged use of the breast pump** is necessary. Thanks to non-contact technology, expressing milk becomes more natural and less stressful for mom.

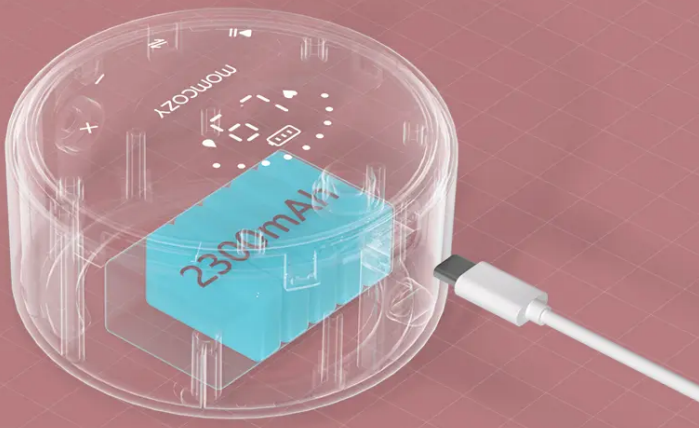

Silence and discretion

The breast pump operates with a noise level of less than **48 dB**, making it extremely **quiet and discreet**. You can express milk in any situation without worrying about disturbing your baby or other household members. **The quietness of the device** makes it ideal for use at night or in other quieter environments.

2300 mAh

Rechargeable battery

6 Pumping Sessions

Computer

Power bank

Car Adapter

Long working time and fast charging

The integrated **1200 mAh battery** provides **150 minutes of use** on a single charge, which is enough for 3-4 sessions of pumping milk. **The charging time is about 2 hours**, which means that the breast pump quickly becomes ready to use again. This makes the device convenient for daily use, providing mobility and efficiency at any time.

Contents of the kit
