Full product description

Momcozy V2 Touchless Breast Pump - Hospital Grade.

The **Momcozy V2** non-contact breast pump is an innovative device designed with convenience and efficiency in mind, ideal for use both at home and in the hospital. Thanks to **modern technology** and **features that adjust the intensity of the suction**, it provides exceptional comfort, and its **quiet operation** makes it one of the more discreet models available on the market.

Innovative technology for non-contact milk extraction

The **Momcozy V2** breast pump is designed to provide comfortable pumping of milk without direct contact with the breast. With this technology, **less pressure on the breast** means **better fit and comfort while pumping**. This is especially useful for moms who need **long-term use of** the breast pump without discomfort.

Adjustable suction intensity and modes of operation

The breast pump offers **9 levels of suction** and **3 modes**: stimulation, expression and mixed mode. Thanks to this adjustment, you have the opportunity to adjust the device to your individual needs, which ensures effective and comfortable pumping of milk. **The maximum suction force is 270 mmHg**, which allows you to empty your breasts quickly and efficiently.

Silence and discretion

With a **noise of less than 48 dB**, the breast pump is **extremely quiet** and does not disturb the environment. You can use it at any time without worrying about disturbing your baby's sleep or other household members. **Discreet and compact**, the breast pump is ideal for use at night or in other quiet spaces.

Long working time and fast charging

The breast pump has a **1200 mAh battery** that provides **180 minutes of use** on a single charge. The charging time is about 2 hours, which makes the device ready to use in a short time. In addition, **automatic shut-off after 30 minutes** ensures energy savings and prevents overheating.

Contents of the kit
