Manufacturer: OPTIX

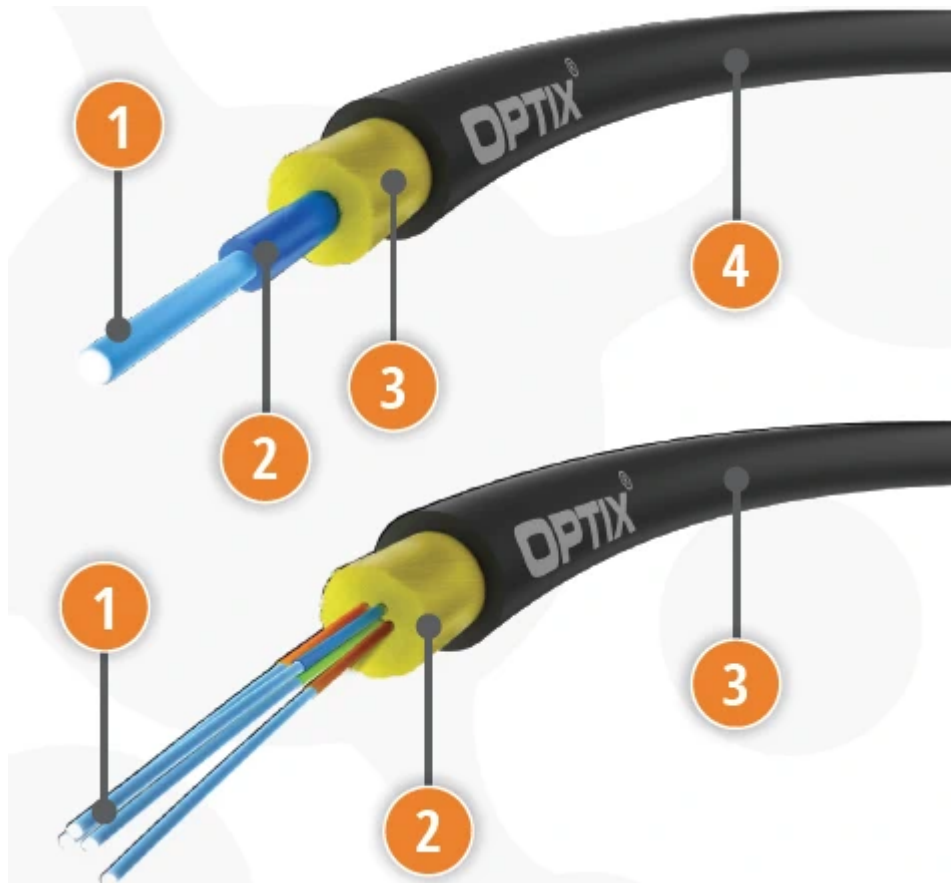

Referention number: DNXGFPIPFMMJM

Full product description

OPTIX AirFlow S-QOTKSdD is a universal, circular and self-supporting FTTx cable that features **aramid fiber** reinforcement (carrier element), lightweight construction of about 3mm diameter, high flexibility and drag resistance. In addition, Optix Airflow cable has a **PU jacket**, UV resistance and is fully **dielectric**. The cable is designed for **overhead and sewer** applications .

Optix Airflow Features

- For outdoor/indoor installation
- Fully dielectric design
- Installation on spans (NESC Heavy) up to 80 meters
- Reinforcement with high-quality aramid fibers
- Reduced diameter
- Resistance to high and low temperatures
- Reduced bend radius - G.657A2 fibers
- Robust polyurethane coating is flame retardant and UV resistant

1J cable construction

- 1. 0.25mm sheathed optical fibers
- 2. 0.9mm color buffer (semi-tight/semi-tight buffer)
- 3. aramid fibers
- 4. FR PU coating, UV resistant
