Full product description

Orvaldi V2000 Sinus 2U LCD

Uninterruptible power supplies of the UPS type provide short-term operation of home or office equipment in the event of a power cut in the general network. Operating in normal mode, UPSs, thanks to their built-in AVR, act as a voltage stabilizer. The voltage range of the mains supply is 162 to 290V. **ORVALDI V(L) 1.1kVA to 3kVA** with a power factor of 0.9, provides servers with full power protection from power failures as well as from the effects of power surges and peaks.

With the added advantage of a universal rack / Tower enclosure and a clear and easy-to-use LCD, **the Orvaldi V2000 Sinus 2U LCD** is ideal for networking, telecommunications, servers and critical applications.

Characteristics

- Pure sinusoidal output voltage
- Output power factor 0.9

- User-friendly and easy-to-use LCDs
- Rack / Tower design
- Line interactive topology
- Built-in AVR voltage regulation circuit
- Programmable power management outputs
- ECO operation for energy saving (performance correcting Optimizer)
- Emergency power off (EPO) function
- USB/RS-232 communication available
- Optional SNMP card and AS400 relay card
