### Full product description

#### Philips EssentialCare

The **PHILIPS 1200W hair dryer** generates optimum airflow and gentle drying power so you can enjoy beautiful hair every day. Equipped with **ThermoProtect function**, which is a combination of optimal airflow and temperature that allows you to dry your hair quickly without over-drying. Allows you to maintain your hair's natural moisture content and a healthy and shiny appearance.

## Types of drying settings for different needs

This compact dryer **offers 3 pre-programmed temperature and speed settings** for **cool air** drying and **fast or gentle drying**. The cool air setting allows you to dry your hair at a relatively low temperature to minimize damage. This feature is especially useful for fine, dry or damaged hair.

## Mobility at your fingertips

**Folding handle for easy carrying.** The dryer features a folding handle so it fits easily into the tightest spaces and can be taken virtually

anywhere. The compact and ergonomic dryer uses a clever, modern design. This makes it lightweight and easy to use.

### Enough power for effective drying

The fast blow setting (II) **provides a higher temperature and more airflow**. Although compact in size, the **1200 watt power** allows you to dry your hair in a gentle and efficient way.
