Potensic

Manufacturer: POTENSIC

Referention number: DNXXGGMPLFRMMJQ

Information:

ATOM is an ultra-compact and stable drone designed for creating striking shots. Equipped with a 4K/30fps camera with a 3-axis gimbal and a Sony CMOS sensor, it delivers sharp videos and 12 MP photos. Advanced stabilisation and a brushless motor guarantee smooth footage even in wind and movement. Intelligent flight modes such as Follow Me, Orbit and digital zoom make creative filming easier. The improved GNSS system, vision sensors and infrared sensors increase safety and hovering precision. Up to 32 minutes of flight, fast charging for three batteries and the intuitive PotensicPro app make ATOM convenient and easy to use.

Full product description

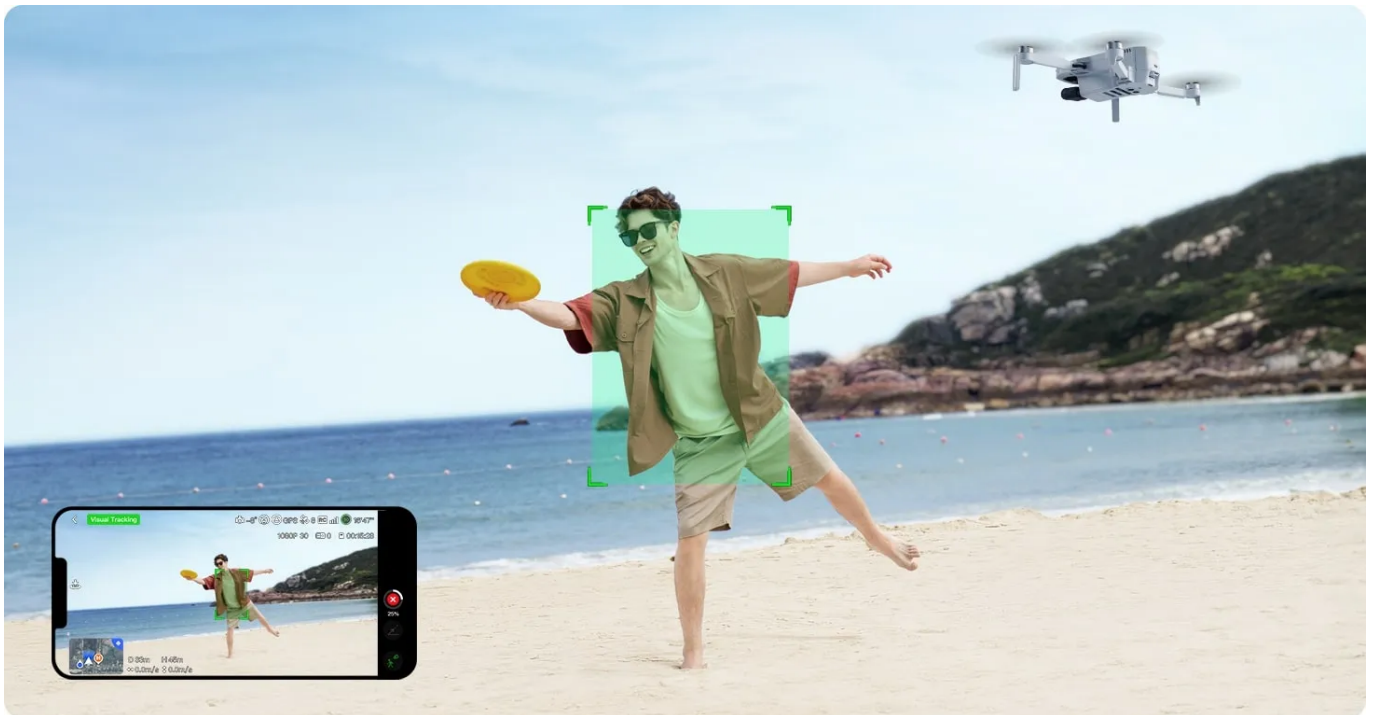

ATOM Highlights Unfolded

Discover a revolution in the world of drones with **ATOM**. Ultra-compact and extremely stable, this drone is the perfect companion for anyone looking to capture breathtaking videos and stunning photos. Equipped with a stabilized camera with a **3-axis gimbal**, ATOM offers robust **4K** footage and **12MP** photos for exceptional image quality and clarity.

Amazing Image Quality

The **ATOM** features an impressive camera with a 3-axis stabilization system and an advanced **Sony CMOS** sensor. Capable of recording **4K/30fps** video and capturing **12MP** photos, every shot is sharp and crisp. With a maximum tilt range of **20° to -90°**, you can capture a wider and clearer range of scenes, regardless of conditions.

Exceptional Stability

Advanced gimbal stabilization technology and an improved brushless motor **ensure ultra-smooth** recordings even in challenging conditions. Regardless of movement or turbulence, **ATOM** keeps recordings smooth and photos sharp. It's the perfect tool for capturing any action without distractions.

Intelligent Flight Features

ATOM is equipped with a new algorithm that recognizes a moving object, which enables automatic capturing to ensure smooth and stable recordings. Features such as **Follow Me** and **Orbit** make tracking and circling around a subject a breeze. In addition, the digital zoom function (1x, 2x, 3x) allows for quick and easy framing of subjects from a distance.

Safety and Precision

With an improved **GNSS u-blox** platform, **ATOM** offers higher performance and an enhanced navigation experience, allowing you to fly with greater confidence and minimizing the risk of losing control. Precision hovering, aided by vision systems and infrared sensors, ensures stability in one place even in high winds.

Long Flight Time and Ease of Use

Equipped with a **Potensic** smart battery, **the ATOM** offers **up to 32 minutes of** flight time on a single charge. The fast charger allows three batteries to be charged simultaneously in just **1.5 hours**. The drone also features the intuitive **PotensicPro** app, which allows you to easily change photo and video settings, as well as remotely update the software, so you'll always be up to date with new features and fixes.

Summary

The ATOM is the perfect solution for creative filmmakers, offering a variety of intelligent flight modes and **advanced features** that make any filming session simple and fun. With ergonomic handles and easy-to-access buttons, operating this drone is extremely comfortable. Indulge yourself in exceptional shots with ATOM!
