Potensic

Manufacturer: POTENSIC

Referention number: DNXXGGMPLJRMNM

Information:

The original Potensic 60W charging hub designed for the ATOM SE drone allows you to charge up to three batteries at the same time in around 90 minutes, significantly reducing pre-flight preparation time. Thanks to its efficient charging, the time needed to charge one battery is the same as when charging three at once, which increases convenience and efficiency of use. The set includes a replaceable EU plug, compatible with European sockets. The accessory is dedicated exclusively to batteries from the Potensic ATOM SE series.

Full product description

Original Potensic charging hub for ATOM SE drone

Optimize the battery charging time of your Potensic ATOM SE drone with Potensic's original 60W charging hub. Designed specifically for the Potensic ATOM SE drone, this practical accessory allows you to charge as many as three batteries simultaneously in just 90 minutes. The hub significantly improves the efficiency of charging, as the time it takes to charge one battery is the same as charging three at the same time. The hub comes with one interchangeable EU plug, suitable for European outlets. This kit is dedicated exclusively to ATOM SE series drone batteries.
