Potensic

Manufacturer: POTENSIC

Referention number: DNXGGMPLKRMOL

Information:

The original Potensic 60W charging hub for the ATOM drone is a practical accessory that allows you to charge up to three batteries at the same time in just 80 minutes. As a result, the charging time for one battery is the same as for charging the whole set, which significantly increases the convenience and efficiency of using the drone. The set includes two batteries and a replaceable EU plug for European sockets. The kit is intended exclusively for batteries from the Potensic ATOM series.

Full product description

Original Potensic charging hub and battery for ATOM drone

Optimize the battery charging time of your Potensic ATOM drone with Potensic's original 60W charging hub. Specifically designed for the Potensic ATOM drone, this practical accessory allows you to charge as many as three batteries simultaneously in just 80 minutes. The hub significantly increases the efficiency of charging, as the time required to charge one battery is the same as charging three at once. The hub comes with two batteries and one interchangeable EU plug, adapted to European outlets. This kit is dedicated exclusively to ATOM series drone batteries.
