Information:

The Powerlink 20V cordless grinder is a high-performance and versatile tool for professionals and demanding DIY enthusiasts. It offers 8500 rpm, complete freedom of movement without cables, and is suitable for cutting, grinding and polishing metal, concrete, wood and other materials. Its compact, lightweight and ergonomic design with a comfortable handle ensures a secure grip, precision and comfort even during prolonged use. The set includes two 4000mAh batteries, allowing you to work without interruptions. Compatibility with 100 mm and 125 mm discs, together with its solid, durable construction, makes it a reliable tool for the workshop and for work in the field.

Full product description

Designed for demanding users

The **Powerlink** cordless grinder is an indispensable tool for professionals and advanced DIYers who want **maximum performance**. With its **8500 RPM speed** and **20V** power supply, it provides fast and efficient cutting, grinding and polishing. **The lack of wires** gives full freedom of movement, which is invaluable when working in hard-to-reach areas. This is the ideal **grinder for metal, concrete** and many other surfaces. The compact size and **high power** make the Powerlink great for both professional workshops and the field. It is the solution for those who **do not recognize compromise**.

Ergonomics and comfort that make a difference

The **Powerlink** was designed with **user comfort** in mind, which is evident the first time you use it. The lightweight housing, intuitive on/off switch and well-shaped **side handle** guarantee a firm grip and maximum control over the tool. Even with prolonged use, the grinder **does not strain the wrists** and does not cause discomfort. This is important especially when precision and **safety at work** are important. **The ergonomic design** minimizes fatigue and allows you to focus on the quality of the tasks at hand. This makes the Powerlink an ideal tool for **everyday, intensive use**.

Work without interruption thanks to dual power supply

You get as many as **two 4000mAh batteries** with the device, which significantly increases the convenience of your work. When one battery charges, the other is ready to go - a simple way to **eliminate downtime**. **The dual-power system** means you can complete longer projects without having to wait. The **Powerlink** cordless grinder is a tool that works as long as you need it to. Ideal for **mobile repair crews**, installers or workshops where time and reliability count. **Performance without compromise** - always on hand.

Versatility for any task

Powerlink is compatible with **100mm and 125mm discs**, making it a versatile tool for many applications. Whether cutting, grinding or polishing, you can count on **precise and even results**. It will work well as **a grinder for concrete, metal**, wood and other materials. Its power and precision mean that you will use it to do both small adjustments and more demanding work. This is a tool that **adapts to your needs**, not the other way around. Looking for **versatility**? Powerlink offers it.

Durability you can rely on

The **Powerlink** angle grinder is built with **solid components** that guarantee a long service life. Its design is resistant to **intensive use** and harsh working conditions. It is a piece of equipment that endures the hardships of everyday duties **without sacrificing performance**. Whether you are working in the workshop, on the construction site or in the field - Powerlink will cope without problems. The well-thought-out housing protects the interior from **dust and mechanical damage**. This is **an investment for years** - today and in the future.
