Full product description

Cutting versatility in your hands

The **Powerlink cordless jigsaw** is a tool that gives you complete cutting freedom without the constraints of cables. Thanks to its variable **speed control**, you can perfectly **adjust** the working speed to the type of material - from precise cuts in **hard wood** to quick passes through plastics. The device also works well for cutting **metal**, making it a truly versatile helper in the home workshop. **The 20-volt power and 4,000 mAh** battery provide high performance and long run time without recharging. This is an indispensable tool for repair and hobby work.

Simple and quick blade change

One of the biggest advantages of this jigsaw is the **quick-change blade**, which allows you to **change blades without tools**. This saves a huge amount of time and convenience - with just one move, you can change the blade and get back in action. The fastening system is durable and secure, which prevents the blade from coming loose during cutting. The ability to react quickly to changing materials makes work smooth and efficient. Safety in use also gains importance, thanks to the secure blade mounting.

Comfort and stability while working

The **ergonomic handle** with a **non-slip finish** guarantees a stable grip even when working for long periods of time. The shape of the handle is designed for natural hand positioning, which significantly reduces fatigue. Even in difficult cutting conditions, the user retains full control over the movement of the tool. **The compact and well-balanced design** ensures precision, regardless of experience level. It's a solution that enhances comfort and safety at the same time.

Complete set ready for action

With the **Powerlink jigsaw** you get a **full set of accessories**: two batteries, a charger, a blade and a sturdy carrying case. This allows you to start working immediately after unpacking - without additional purchases. **The carrying case** makes it easy to store the device and keep it organized in the workshop or garage. This is an ideal choice for people who are looking for a practical and mobile tool for many tasks. The set will meet the expectations of both professionals and ambitious do-it-yourselfers.

Ideal for cutting wood, metal and plastics

The **Powerlink cordless jigsaw** can handle a wide range of materials - from boards and plywood to metal parts and harder plastics. Thanks to

its adjustable cutting and precision guidance, each cut is accurate and clean. This is a tool that will be ideal for finishing work, renovation or furniture construction. Regardless of the location - home, garden, garage - the jigsaw provides **full mobility** and comfort.
