Full product description

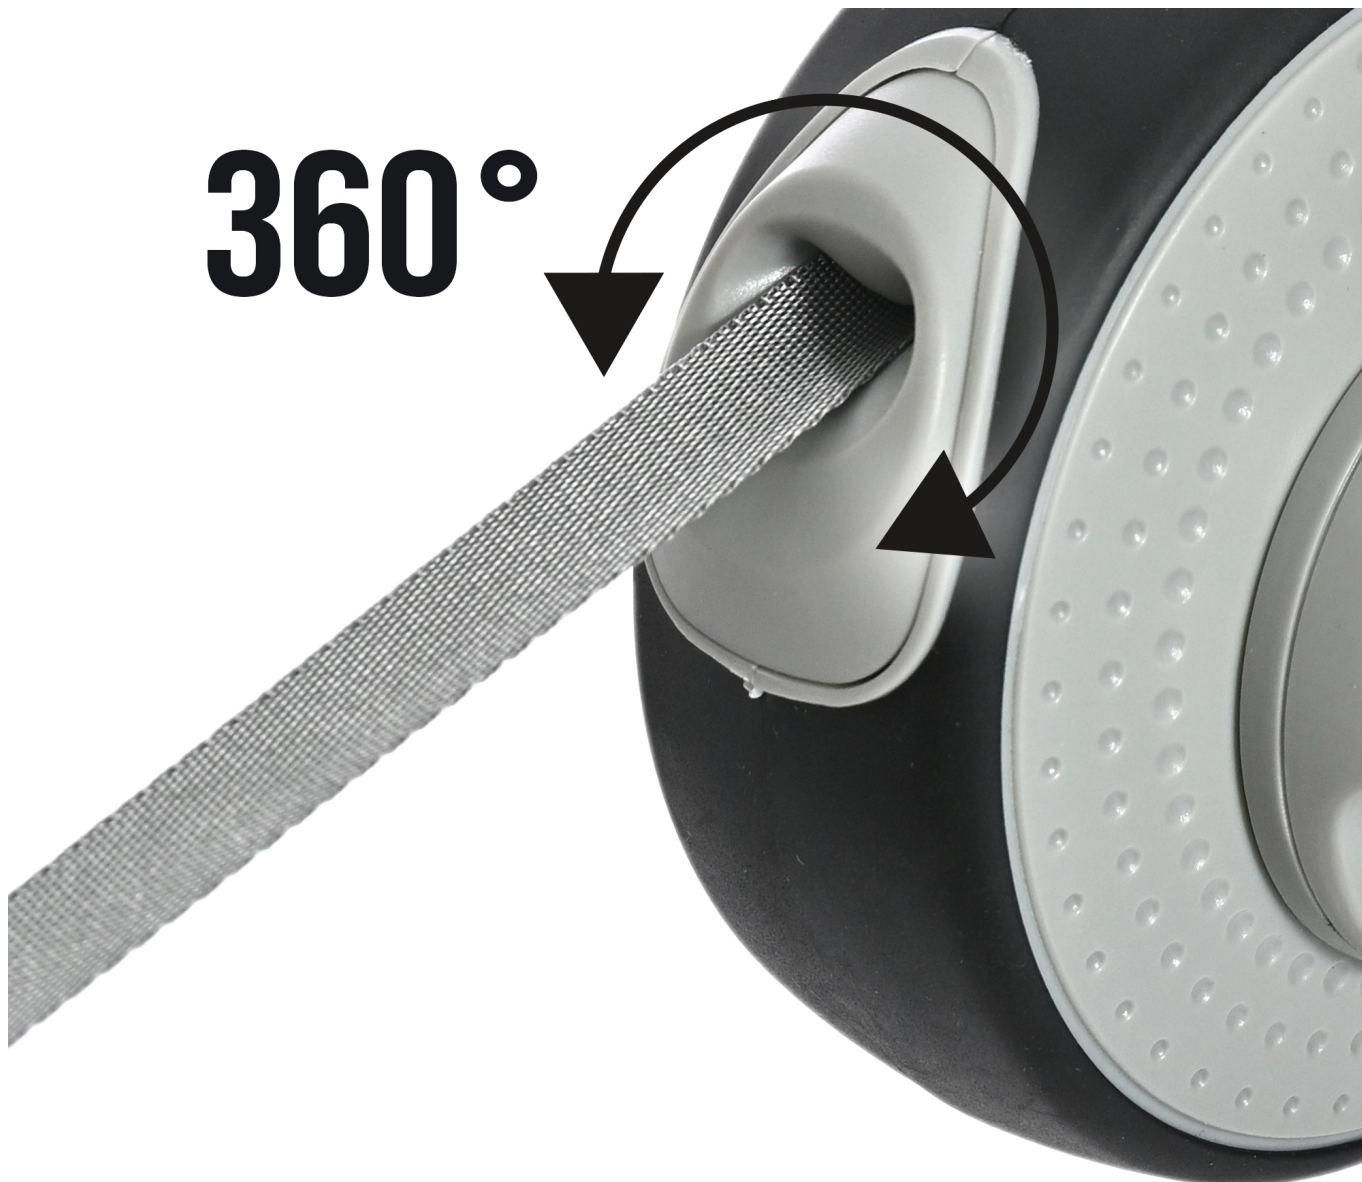

Automatic leash - walking without problems

Instead of carrying three separate items - just take **one leash**. **PUPILPLANET automatic leash 5m with flashlight and bag container** is a convenient, functional and well thought-out accessory for every dog owner. Take care of the comfort and safety of walks with your pet - without constantly untangling the strap and searching for poop bags in your pocket. The leash combines **an ergonomic handle, a bag container and an LED flashlight**, so you no longer need to take additional accessories. It is suitable for dogs weighing up to 30 kg and provides freedom of movement over a distance of up to **5 meters**.

Automatic leash - full length, full control

The **5-meter** long leash allows your dog to move freely, while you get **easy control with the help of a locking mechanism**. You have a smoothly operating mechanism that responds instantly to the button. This gives you full control without tugging or jerking.

5m with flashlight and container - ready for any situation

The biggest advantage? **A built-in LED flashlight and bag container.** The flashlight improves **visibility after dark** - great for evenings and early mornings. You don't have to hold your phone in your hand - everything is built into the lanyard. **The bag container**, on the other hand, makes cleaning up after your pet much easier. You put the roll in once and have it always at hand - no searching, no forgetting.

Ergonomic handle - comfortable in any hand

The TPE handle fits well in the hand, does not slip and does not cause abrasions even during longer walks. The leash is lightweight and designed for everyday use. No matter the weather or the length of the route, the **holding comfort** remains the same. This **automatic leash** with **flashlight and bag container** was also thought out for your convenience.

Durability and functionality

The leash combines a wide strap, durable mechanism, bag container and LED flashlight in one accessory. This gives you control over your dog, the convenience of a walk and safety after dark. **And all in one handy leash.**
