Price: **158.83 zł** gross / 129.13 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGFOJKERMLOO

Product features

SFP transceiver type	Copper
CD-ROM interface type	SFP
Maximum data transfer rate	1.25 Gb/s
Brand compatibility	HP/Aruba
Networking cable category	5e/6/7
Maximum transfer distance	100 m

Full product description

Cost-effective RJ45 1.25G SFP module dedicated for HP/Aruba

The **Extralink SFP RJ45** with **1000 Mbps** is a high-performance, cost-effective module that complies with Gigabit Ethernet and 1000-BASE-T standards as defined in IEEE 802. 3-2002 and IEEE 802.3ab. The SFP RJ45 insert supports data rates of 1000 Mbps over a maximum distance of **up to 100 meters** for **Category 5 Ethernet** cable. The SFP RJ45 module supports full duplex data links of 1000 Mbps with 5-level pulse amplitude modulation (PAM). All four pairs in the cable are used at a symbolic rate, which is 250 Mbps per pair. The Extralink SFP RJ45 provides standard **SFP MSA-compliant** serial ID information, which can be accessed via the A0h address via the 2-wire CMOS EEPROM serial protocol. The physical IC can also be accessed via the 2-wire serial bus at address A0h. The SFP RJ45 insert is compatible with most gigabit SFP ports found in network equipment. The SFP Ethernet module's all-metal housing makes the device characterized by low EMI. The presented insert is designed for **HP/Aruba** devices.
