Full product description

Meet RF Elements HG3-CC-S60, a sector antenna that delivers unmatched performance and reliability.

With an impressive 13.2dBi energy gain and 60° beamwidth, this antenna is ideal for demanding wireless users. The use of high-quality materials and innovative technology guarantees durability and resistance to harsh weather conditions.

High energy gain

The Elements HG3-CC-S60 RF antenna offers an energy gain of 13.2dBi, providing **excellent performance and long-range signal coverage**. As a result, your network will operate stably and efficiently, even in harsh conditions. It is ideal for professionals who need reliable WLAN equipment.

Precise beam width and durability

With a beamwidth of 60°, the RF Elements HG3-CC-S60 sector antenna allows for accurate and efficient signal targeting. The antenna is designed for outdoor operation, as evidenced by its IP55 rating. Made of UV and corrosion-resistant materials such as stainless steel and plastic - the antenna from [RF Elements](#) is **extremely durable and reliable**.
