Full product description

RF Elements HG3-TP-S70 sector antenna that will revolutionize your wireless network.

With a beamwidth of 70° and an energy gain of 12dBi, this antenna provides exceptional performance and reliability in the 5GHz frequency range. Superior materials and state-of-the-art technology guarantee durability and resistance to harsh weather conditions.

High energy gain and beamwidth

The antenna from [RF Elements](#) offers an energy gain of 12dBi and a beamwidth of 70°, providing **excellent performance and wide area coverage**. As a result, your network will operate stably and efficiently, even in areas with a high density of network devices. It is ideal for professionals who need reliable WLAN equipment.

Innovative TwistPort™ connector

Thanks to the innovative TwistPort™ connector, installation of the Elements RF antenna is quick and hassle-free. The TwistPort™ mechanism makes it easy to connect and disconnect the antenna without tools, significantly saving time and minimizing the risk of damage. This solution is not only practical, but also ensures **the best connection performance**.

Durability and weather resistance

The antenna is designed for outdoor use, as evidenced by its **IP55 rating**. Made of UV and corrosion-resistant materials such as stainless steel, aluminum and plastic, the RF Elements HG3-TP-S70 sector antenna is extremely durable and reliable. You can be sure that it will work reliably in all weather conditions.
