Full product description

NanoBracket SXT 2.0 is the second generation NanoBracket for RB SXT

NanoBracket SXT 2.0 is the second generation of NanoBracket for RB SXT. The improved 3-axis positioning system enables smooth adjustment of **RouterBoard SXT** in azimuth, height and rotation.

Installation and durability

Mounting on a pole or wall is now **easy**. The NanoBracket is designed to be **resistant**. The base of the handle is made of cast aluminium and the plastic parts are made of weather-resistant ABS. All parts are made of stainless steel.
