Full product description

Pole and brick clamp for ePMP1000 mounting

The second generation of our innovative **NanoBracket** - now for the integrated radio **Cambium Networks ePMP 1000**! NanoBracket is the most advanced solution for CPE installation and positioning, environmental resistance and durability. The second generation of NanoBracket **offers improvements to the 3-axis control system**, and in addition **increases ease of installation and outdoor durability**, thanks to the use of cast aluminium and polycarbonate.

Easy installation

We divided the installation into two stages to make it more user-friendly. 1) Install the bracket on the pole or on the wall and then fix the CPE. 2. adjust the position and tighten the main nut. Ready!
