Full product description

Outstanding case performance from RF Elements

StationBox XL CARRIER CLASS is an aluminum CPE antenna outdoor enclosure designed to meet the highest demands for performance, durability and environmental resistance. The built-in **double polarization antenna with high gain**, adjustable 3-axis NanoBracket mount and IP65 environmental resistance is the most advanced integrated CPE solution on the market.

Easy integration and high strength

StationBox XL is a Carrier type outdoor enclosure with a built-in high gain dual-polarization antenna. It was designed for **easy integration with MikroTik**. routers. The enclosure is durable, made of aluminum alloy.
