Full product description

CARRIER CLASS sector

The **CARRIER CLASS** sectors meet customer requirements in terms of radio performance, noise resistance at the collocation site, ease of installation and cost effectiveness. The antennas are equipped with the innovative BackShield™ system, a patent-pending system of selective frequency reflectors built into the antenna structure to attenuate the side and rear panel near the radiation field.

Triple polarisation

The 5 GHz 16 dBi sector antenna is a triple version of the CARRIER CLASS sector polarization with two vertical and one horizontal polarization antenna.
