Full product description

Symmetrical sector antenna type HORN

An **RF Elements** sector antenna with 60 degree beam, antenna gain is **13.2 dBi**. It is a **symmetrical horn** type sector antenna (horn) from the SH-CC series offering exceptional performance, typical for RF products, in a very compact housing. It is an antenna that provides symmetrical coverage of a specific surface. It is characterized by long range.

Zero-zone solution

RF Elements SH-CC antennas are the ideal solution to cover areas with the existing "zero zone" with **high intensity of the audience**.
