Full product description

StationBox Mikro

StationBox Mikro (SBXM) is an external enclosure designed for motherboard families **RB911**, **RB711**, **RB411**. You don't need any tools to install the board, because it is fixed with plastic clips. The main parts also have a convenient snap-on system, which ensures quick installation.

Weather-resistant housing

StationBox Mikro handles are compatible with NanoBracket Universal and EasyBracket S, and the unit's housing is made of UV-resistant ABS plastic. At the same time, it is protected from water and can "breathe". - to release hot air and condensate drops.
