Full product description

External aluminum housing for RouterBoard MikroTik

StationBox S CARRIER CLASS is a compact enclosure designed for **RouterBoard™ RB922, RB912 and RB911**. The StationBox S CARRIER CLASS is made of aluminum, which ensures durability, increases resistance to environmental conditions and radio waves shielding. In combination with RouterBoard it provides **compact, durable and easy to use** equipment.

Compatibility with UBNT airMax

The plug-in screen radio is powered by **technology MikroTik**. Thanks to its compatibility with the UBNT airMax radio mounting system, it can be attached to dedicated antennas. StationBox S is designed for **MikroTik RouterBoards RB922, RB912, RB911 and RB711..** It can be adapted to the configuration of 3x3 connector, it also offers pre-formed positions for additional connectors on the bottom of the enclosure.
