Price: **32.29 zł** gross / 26.25 zł net

Manufacturer: RF ELEMENTS

Referention number: DNXGGILPJRMLM

Product features

Product type	Antenna adaptor
Operating temperature (T-T)	-40 - 60 °C
Frequency range	5180 MHz
Product colour	Grey
Survival wind speed	160 km/h
Antenna connector type	RP-SMA
Watch case material	Acrylonitrile butadiene styrene (ABS)

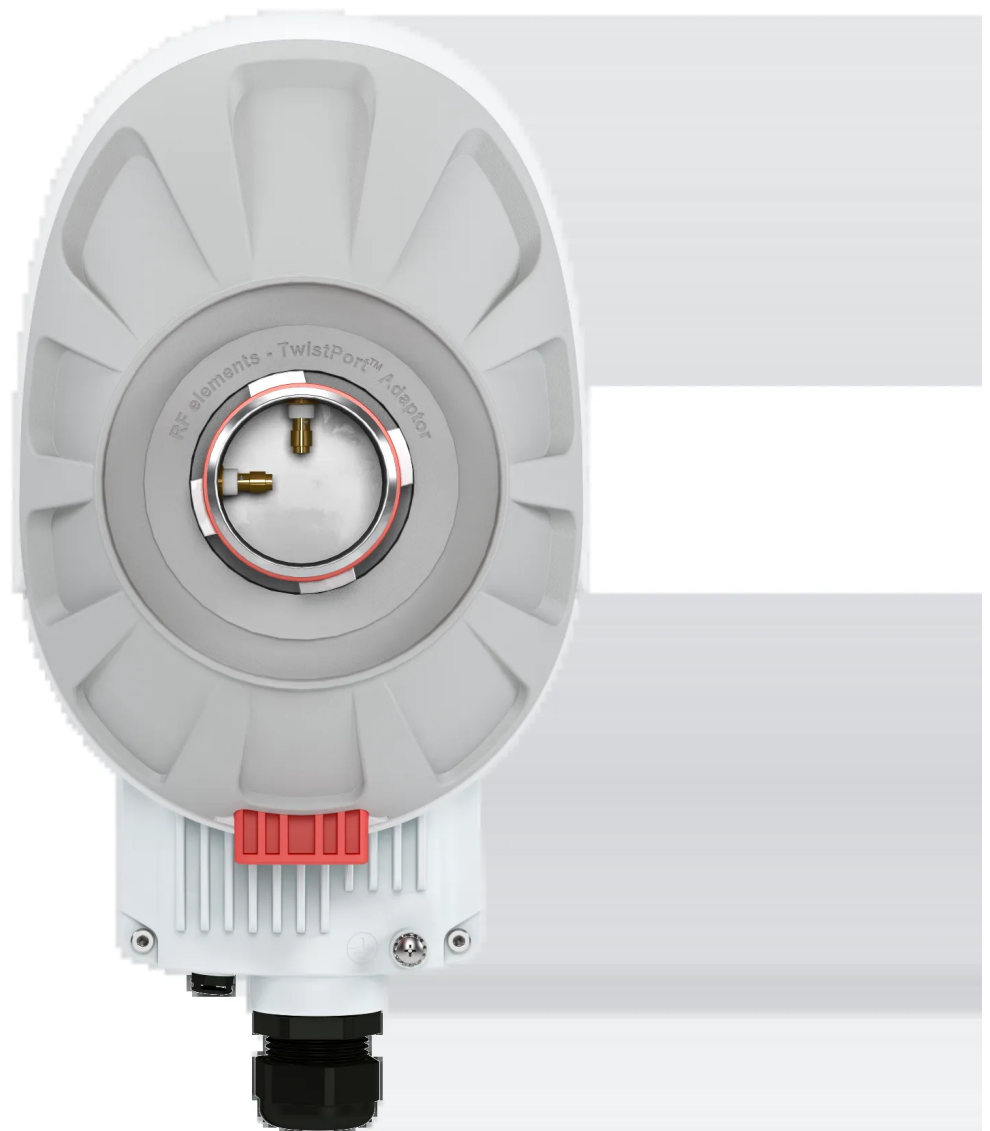

Full product description

Meet RF Elements TPA-A5X TwistPort adapter that significantly streamlines installation and improves the performance of your network.

Thanks to the innovative TwistPort connector, the adapter offers ease of installation and the highest quality network connections. This is an indispensable accessory for anyone who wants to achieve maximum efficiency and reliability of their equipment.

Easy to install

The TwistPort adapter is designed to make device installation as easy as possible. The TwistPort mechanism allows quick and tool-free installation and removal of the antenna, which significantly **saves time and minimizes the risk of damage**. This is an ideal solution for professionals and networking enthusiasts.

High performance

RF Elements TPA-A5X provides excellent performance with dual H V polarization. The use of high-quality aluminum and weather-resistant plastic guarantees **durability and reliability**. With this adapter, your network devices will operate with maximum efficiency, offering better range and connection stability.

Compatibility and durability

Dedicated to the [Mimosa A5X](#), it ensures optimal fit and reliable performance. Made of materials resistant to UV radiation and extreme weather conditions, the adapter is suitable for use in a variety of environments.
