Full product description

TwistPort adapter for Rocket Prism 5AC and airFiber 5X Ubiquiti

The TPA-PAF adapter makes **Rocket LTU, Rocket Prism 5AC, Rocket Prism 5AC Gen2, airFiber 5X and airFiber 5XHD** compatible with any TwistPort antenna. The TPA-PAF contains **well-protected space for the GPS antenna, which is supplied with the UBNT.** radio. The TwistPort adapter adapts devices from other manufacturers to the **optimized TwistPort™ RF Elements.** waveguide connector.

Compatibility and installation

Compatibility of third party devices with TwistPort allows you to use the radio with any commercially available TwistPort antenna, providing **excellent performance, noise immunity and network scalability**. Connecting and disconnecting the radio from the TwistPort adapter is **very simple and requires no tools**.
