Full product description

Antenna with TwistPort connector

UltraDish TP 380 models are designed for CPE or PtP connections. The antenna rector is made of die-cast aluminum, which ensures uniform shape. Virtually lossless TwistPort connector guarantees easy implementation and maintenance of the radio.

Installation and assembly

The installation and mounting of the antenna is extremely easy and fast. Innovative antenna brackets, with a wide range of pole diameters, can be easily converted to right or left-handed brackets. One HEX tool is all you need for installation.
