Price: **1,999.00 zł** gross / 1,625.20 zł net

Manufacturer: ROBOROCK

Referention number: DNXGGNHRIRMMML

Product features

Brush material	Rubber
Programming function	Yes
Runtime	180 min
Shape	Round
Remotely operated	Yes
Works with the Google Assistant	Yes
Edge recognition	Yes
Battery capacity	5200 mAh
Brush type	Roller brush
Automatic base station return	Yes
Base station	Yes
Wet mopping	Yes
Performance	99.7 %
Easy to clean	Yes
Works with Amazon Alexa	Yes
Suction power	4200 Pa
Dust container type (base)	Dust bag
Base station functions	Charging
Navigation type	3D Smart Navigation
Self-emptying dust container	Yes
Obstacle detection	Yes
Battery technology	Lithium-Ion (Li-Ion)
Product colour	Black

Animal care	Yes
Dust container type	Bagless

Full product description

Unmatched Cleaning Power and Efficiency

The **Roborock Q7 Max cleaning robot** combines advanced cleaning technologies that have been perfected by successive generations of Roborock vacuum cleaners. With a **maximum suction power of 4,200 Pa**, it effectively removes dirt hidden in carpets and debris from floor crevices. With its durable rubber brush, it is ideal for heavy-duty carpet cleaning, while minimizing the risk of hair entanglement.

Automatic Emptying for Your Convenience

Using **Pure's Auto-Empty Dock Dock Station**, you can enjoy a clean home without having to empty the container frequently. The docking station automatically empties the vacuum into a **2.5-liter bag**, allowing for **up to 7 weeks of maintenance-free cleaning**. The dust bag also acts as an effective air filter, **removing 99.7% of pollen as small as 0.3 microns**.

Vacuuming and Mopping at the Same Time

The **Q7 Max robotic vacuum** offers the ability to vacuum and mop at the same time for even more thorough cleaning. Equipped with an electronic pump, it offers **30 levels of water flow**, allowing you to customize cleaning for different floor types and preferences. The **combined dust container (470 ml) and water tank (350 ml)** increase the total capacity and make it easier to use.

Long-Term Operation on a Single Charge

Powered by a powerful **5200 mAh lithium-ion battery**, the Q7 Max can run continuously for **up to 3 hours on a single charge**. That's enough to clean most homes without needing to recharge.

Intelligent Mapping and Advanced Features

The **PreciSense LiDAR system** is the heart of the Q7 Max smart vacuum cleaner. The maps created feed a set of functions controlled via the Roborock app. With **3D mapping**, you can see the exact layout of your home and **add fixtures**, creating a realistic representation of the space. **Advanced scheduling** allows you to create personalized cleaning schedules tailored to your lifestyle.

Automatic Level Recognition and Security

With its **multi-level mapping system**, the Q7 Max automatically **recognizes the different levels of your home**. It supports up to four levels without the need for additional docking stations. In addition, features such as **Forbidden Zones and Invisible Walls** ensure that the robot avoids specific areas, guaranteeing safe and precise cleaning.

Easy Control and Integration with Voice Assistants

Control your Q7 Max easily with your voice thanks to support for **Amazon Alexa, Google Home and Apple Siri**. A **parental lock function** protects against accidental activation by curious children or clumsy pets. The Q7 Max is also equipped with **an array of sensors** to prevent falls, locking or collisions with obstacles.

Ideal for any home

Roborock Q7 Max is **an advanced cleaning robot** that combines extraordinary suction power, the convenience of automatic emptying, intelligent mapping and ease of use. Ideal for any home, providing **cleanliness and comfort at the highest level**. Experience how easy and effective cleaning can be with Roborock Q7 Max.
