Price: **1,798.00 zł** gross / 1,461.79 zł net

Manufacturer: ROBOROCK

Referention number: DNXGFPISHRMMNO

Product features

Height	96.5 mm
Width	353 mm
Depth	350 mm
Programming function	Yes
Runtime	180 min
Shape	Round
Edge recognition	Yes
Battery capacity	5200 mAh
Automatic base station return	Yes
Floor surfaces supported	Carpet
Integrated sensors	Accelerometer
Base station	Yes
Smartphone/tablet remote support	Yes
Wet mopping	Yes
Base station functions	Charging
Battery technology	Lithium-Ion (Li-Ion)
Battery life	200 m2
Rechargeable	Yes
Product colour	White
Dust container type	Bagless

Full product description

Roborock S5 Max Vacuum Cleaner White - full comfort of use

Get yourself clean, daily washed floors with **S5 Max**. The Xiaomi cleaning robot designed for smooth, automatic mopping is equipped with a **large water tank**, precise water level control, virtual zones without mopping. Precise laser mapping, advanced navigation and intense vacuum suction make floor cleaning easier than ever.

Automatic mopping

The large **290 ml water container** is sufficient to wash a 65 m² flat or 200 m² house three times in one go. **Xiaomi Roborock S5 Max** is equipped with a modern, ultra-precise peristaltic pump for use in hospital drip trays, which has been tested for over 1500 hours to guarantee trouble-free operation for a long time.

Water flow control in Xiaomi Roborock S5

Select the right water flow for each floor type and level of soiling through the application. **Robot Xiaomi Minutes** regulates the water level, reducing it when cleaning small areas, and also turns off the flow where the surface has already been cleaned. When cleaning is complete, it turns off the water, the mop can dry out and the unit returns to the docking station.

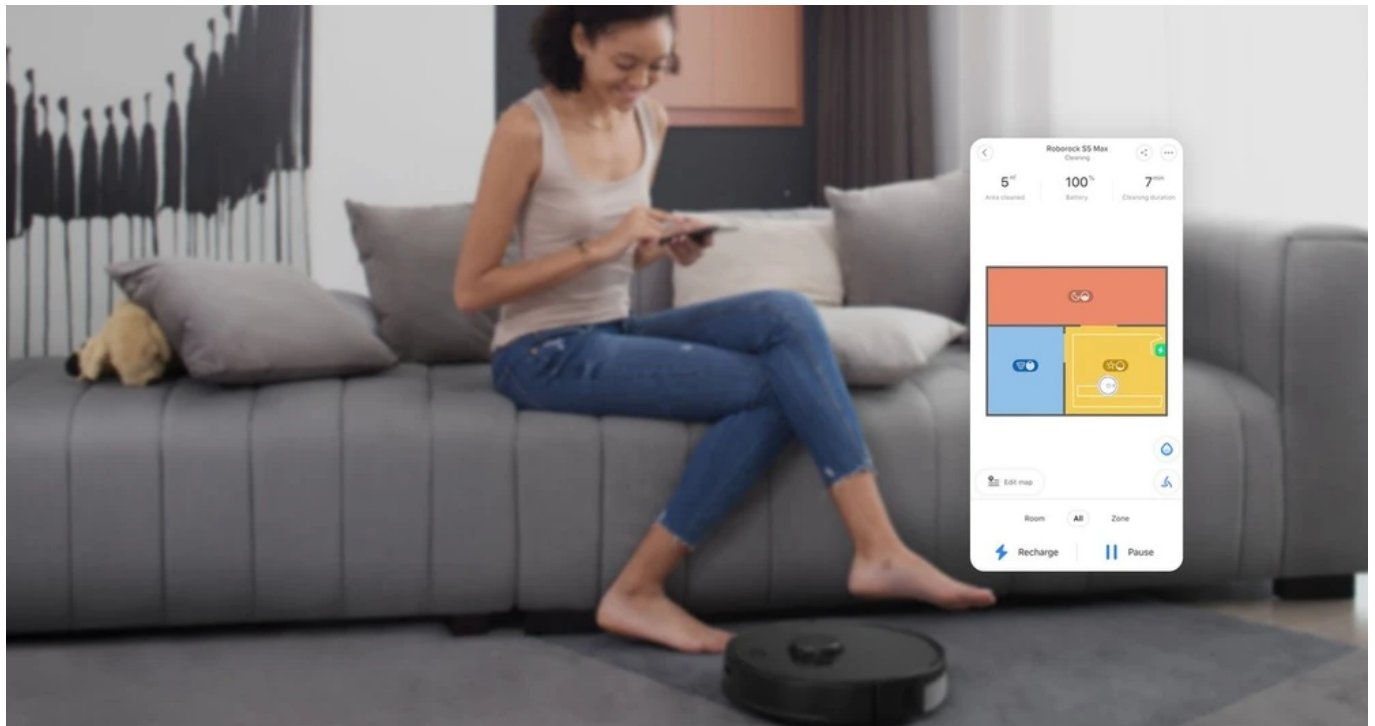

Zones without mopping

Protect your carpets or other surfaces from getting wet with mop-free zones and virtual barriers. Separate your carpets with barriers or completely exclude the rooms you choose from mopping. With the no-mopping zone and barrier system, you have complete control over the areas where your S5 Max is to work.

Total control of the rooms to be cleaned

Roborock Vacuum Cleaner knows the layout of your house. Its laser rangefinder rotates at 300 revolutions per minute, sending a real time **Scanning 360°** using the SLAM algorithm. Using this data, it creates a 98% accurate room map. This allows you to plan the cleaning of one or more rooms, or the entire house, with a few simple touches on your phone.

Xiaomi Roborock vacuum cleaner - reliable navigation

The powerful **32-bit quad-core processor** makes the S5 Max an intelligent device that recognizes the shape of the room and learns where the obstacles are. It uses this knowledge in its navigation system, **determining the most effective route** to clean up without forgetting any flooring.

Xiaomi Roborock vacuum cleaner - your smart and discreet helper

Xiaomi Roborock S5 Max will clean the house during your absence. **A series of environmental sensors**, including an accelerometer, odometer, infrared, compass, bumper and a super accurate map of the entire house will make the device do its job accurately and safely. Thanks to the safety features, the robot will not fall down the stairs or hit the walls, bypass the obstacles and do not get blocked.

Intensive suction

Inside the **Roborock Vacuum Cleaner** there is a specialized fan that rotates at **15000 rpm**. The suction generated by it is strong enough to lift e.g. an AA battery, so it will easily clean the floor or carpet of any dust. The suction power is high even when the dust container is full.
