Product features

Height	96.5 mm
Battery recharge time	5 h
Width	353 mm
Depth	350 mm
Runtime	180 min
HEPA filtration system	Yes
Shape	Round
Battery capacity	5200 mAh
Package weight	6000 g
Automatic base station return	Yes
Wet mopping	Yes
Package depth	403 mm
Package height	152 mm
Package width	489 mm
Noise level	67 decibel
Base station functions	Charging
Wi-Fi	Yes
Product colour	Black
Dust container type	Bagless
Diameter	350 mm
Product weight	3700 g

Full product description

Xiaomi Roborock Vacuum Cleaner S6 MaxV

The Xiaomi Roborock Vacuum Cleaner S6 MAXV is a cordless, portable automatic vacuum cleaner that is a **great helper in the daily cleaning of your home**. The robot is equipped with virtual artificial intelligence functions combined with laser scanning technology. **The device uses multi-level mapping**, which allows you to recognize 4 floors in your home without the need for an additional docking station. The **powerful 2500PA suction fan** guarantees very thorough vacuuming and floor cleaning, without any effort on your part.

Intelligent sensor

The Roborock S6 MaxV robot is equipped with a **special LiDar navigation system** that has been developed with your home in mind. The system not only locates obstacles on its path, but also estimates its location and size by adjusting the route around the obstacle. **The device also has an infrared system** that allows the robot to work in the dark, which allows you to use all its advantages both at night and at night. **all this in a simple way and without your interference.**

Vacuuming and mopping function

Roborock S6 MaxV is a robot that combines two cleaning functions. A **powerful 2500PA motor**, which allows the vacuum cleaner to pick up large amounts of dust and dirt from your home, but also a mop function that allows you to wet-clean floors with a mop. **The Xiaomi Mi Roborock S6 MaxV will do it all completely automatically**, and you can enjoy your vacuumed carpets and washed floors.

Vacuuming on different floors

The Roborock S6 MaxV is the most flexible automatic vacuum cleaner on the market. The Multilevel Mapping system allows the robot to identify different floors of your home, on each floor you can define different restricted areas as well as areas without using a mop.

Smartphone control

Roborock S6 MaxV, thanks to a dedicated MI Home application available for Android and iOS, allows you to program the robot's work. You can set cleaning times for the robot during the whole week, you can also check what obstacles are on the floor of your home, or see a map of the route the vacuum cleaner takes.

Main features:

- The most powerful Robrock model with 2500PA power
- Dual camera system and infrared sensor
- Dedicated Mi Home application
- Compatible with Qualcomm APQ8053
