Price: **1,999.00 zł** gross / 1,625.20 zł net

Manufacturer: ROBOROCK

Referention number: DNXXGFOQMHRMMNQ

Product features

Height	96.5 mm
Width	353 mm
Depth	350 mm
Runtime	150 min
Shape	Round
Remotely operated	Yes
Battery capacity	5200 mAh
Silent mode	Yes
Power consumption (typical)	58 W
Automatic base station return	Yes
Floor surfaces supported	Carpet
Threshold climbing (max)	20 mm
Integrated sensors	Accelerometer
Base station	Yes
Wet mopping	Yes
Number of programs	14
Stairs detection	Yes
Noise level	58 decibel
Base station functions	Charging
Battery life	250 m2
Rechargeable	Yes
Product colour	Black

Full product description

Xiaomi Mijia Roborock Vacuum Cleaner S6 - cleaning robot

Xiaomi Mijia Roborock is a compact, **intelligent home appliance** that combines the functionality of a maintenance-free **vacuum cleaner and mop** in one. **The latest model Roborock S6** has all the advantages of its predecessor from the **series S5** and the innovations introduced make cleaning easier and more effective. This excellent helper vacuums and cleans floors very thoroughly. Bet on modern solutions and comfort of cleaning, because thanks to Roborock cleaning robot your apartment will shine and you will gain free time.

Roborock S6 - vacuum cleaner and mop in one

The Roborock S6 combines two functions that allow you to first sweep the floor and then wet mop it up. The mop is as wide as the main brush of the vacuum cleaner to ensure effective cleaning, and is placed next to a built-in tank that absorbs water. Thanks to the built-in sensors, the machine doses the right amount of water for thorough cleaning when mopping.

New turbo brush

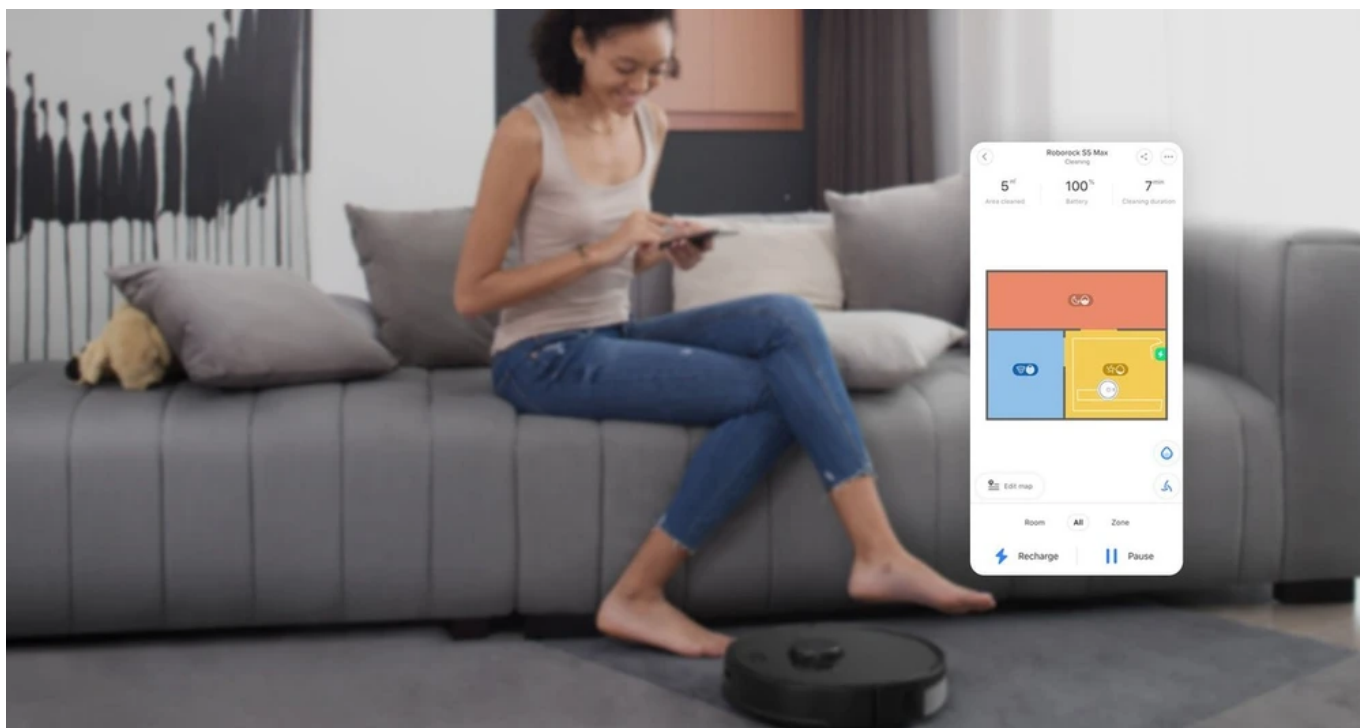

The turbo brush is made of soft, dense bristles (230% denser than in the S5 series) from **DuPont**, and the five-arm **horn brush** is made of rubber, which makes **cleaning even more effective**, and what is important, does not damage floors.

Control by application

Xiaomi Home application available in Polish **has been improved**. The user can not only view a map of his apartment and set a cleaning schedule, but also create virtual walls, divide the apartment into zones and clean only the selected ones, save several different maps, e.g. for different floors of the house or several apartments. The application allows for full control of the robot from anywhere in the world.

Greater suction power

Suction power of **2000 Pa** guarantees high efficiency in dirt collection. **The tornado system** coordinates the turbo brush and the side brush, ensuring thorough cleaning of the floor. The device easily distinguishes between the materials of which the surfaces are made and automatically adjusts the appropriate suction power, which is different for carpets and rugs and different for wooden floors or tile.

Modern navigation technology

Roborock S6 uses the most **advanced laser distance measurement technology LDS** (Laser Distance System) to navigate the environment in a 360 degree range and a **SLAM** algorithm to create interior maps. The robot is equipped with a bumper system, which eliminates the risk of damage in case of contact with different surfaces.

Improved base station

Overvoltage and short-circuit protection guarantees **high safety** and a longer service life of the vacuum cleaner. The improved base station of the **S6** model makes it possible to hide the power cord inside it, which not only improves safety but also aesthetics. **The battery level sensor** monitors the robot's charge level. Thanks to infrared navigation, the device automatically returns to the docking station to recharge the battery and then automatically continues the interrupted cleaning process.

Powerful battery and quiet operation

The Roborock S6 is even **50% quieter** than its predecessor, allowing the vacuum cleaner to clean at different times of the day without disturbing the householders in their daily activities. **E11 class E11** HEPA filter with waterproof Teflon coating provides **95% filtering efficiency** even after one year of use. **The powerful lithium-ion battery with a capacity of 5200 mAh guarantees up to 3 hours of continuous operation, which means 250 m² of tidy flat.**
