Price: **2,759.00 zł** gross / 2,243.09 zł net

Manufacturer: ROBOROCK

Referention number: DNXXGGHHOFRMLNO

Product features

Height	96.5 mm
Width	353 mm
Depth	350 mm
Runtime	180 min
Shape	Round
Remotely operated	Yes
Battery capacity	5200 mAh
Battery voltage	14.4 V
Package weight	7000 g
Automatic base station return	Yes
Wet mopping	Yes
Package depth	462 mm
Package height	144 mm
Package width	384 mm
Indication light	Yes
Wi-Fi	Yes
Battery technology	Lithium-Ion (Li-Ion)
Product colour	White
Dust container type	Bagless
Product weight	4700 g

Full product description

The newest cleaning robot Roborock S7 with sonic technology

To remove dried dirt, vacuuming is not enough. You need to scrub. **Roborock STS sonic technology** scrubs floors **up to 3,000 times per minute!** It eliminates the dried dirt that some robots leave behind, from coffee to muddy shoe marks and more. Combined with **Roborock's** first **auto rising mop**, thorough floor cleaning is within your reach. Add the fully rubberized main brush and **HyperForce 2500Pa** suction, and you have a cleaning robot that can handle tough dirt.

Sonic mopping

Sonic vibration technology enhances robotic mopping performance. No more ordinary floor mopping. The **Roborock S7** robot mop scrubs **up to 3000 times per minute**. Combined with water delivered from an electronically controlled **300ml** tank, the S7 vacuums floors deeply and effectively.

Intelligent mop lift

The smart mop lifts up when it detects your carpet or rug, so you can mop your floors and vacuum your carpets at the same time. The mop also lifts up when docked and when finished, so you can say goodbye to dirty marks and streaks.

Ultrasonic carpet recognition

Using ultrasound, the S7 recognizes carpets with extreme accuracy. Vacuum your entire house once to create a map of your home and designate areas without mopping, such as carpets and rugs.

Once it detects the carpet, Rororock S7 will pick up its mop and start vacuuming.

Improved main brush for more thorough cleaning

To move dirt, the brush must stay close to the floor. Upgraded to allow for multi-plane movement, the new S7 floating main brush sticks precisely to the floor, even on uneven surfaces, for better cleaning.

High power and long service life

Equipped with the **HyperForce™** suction system, the S7 uses **2500 Pa of suction power** to capture fine dust from floors and hair from carpets. The **470ml** dust container holds the dust from each day. The **300 ml** water tank allows you to mop **up to 200 m² in one session**. Powered by a **5200 mAh** lithium-ion battery with up to **3 hours** of battery life on a single charge.
