Price: **1,899.00 zł** gross / 1,543.90 zł net

Manufacturer: ROIDMI

Referention number: DNXGFQQRIRMNKH

Product features

Height	100 mm
Width	355 mm
Depth	355 mm
Base station weight	4300 g
Base station dimensions (W x D x H)	350 mm
Runtime	250 min
Shape	Round
Battery capacity	5200 mAh
Power consumption (typical)	850 W
Automatic base station return	Yes
Wet mopping	Yes
Suction power	2700 Pa
Dust container type (base)	Dust bag
Product colour	White
Dust container type	Combi
Product weight	3500 g

Full product description

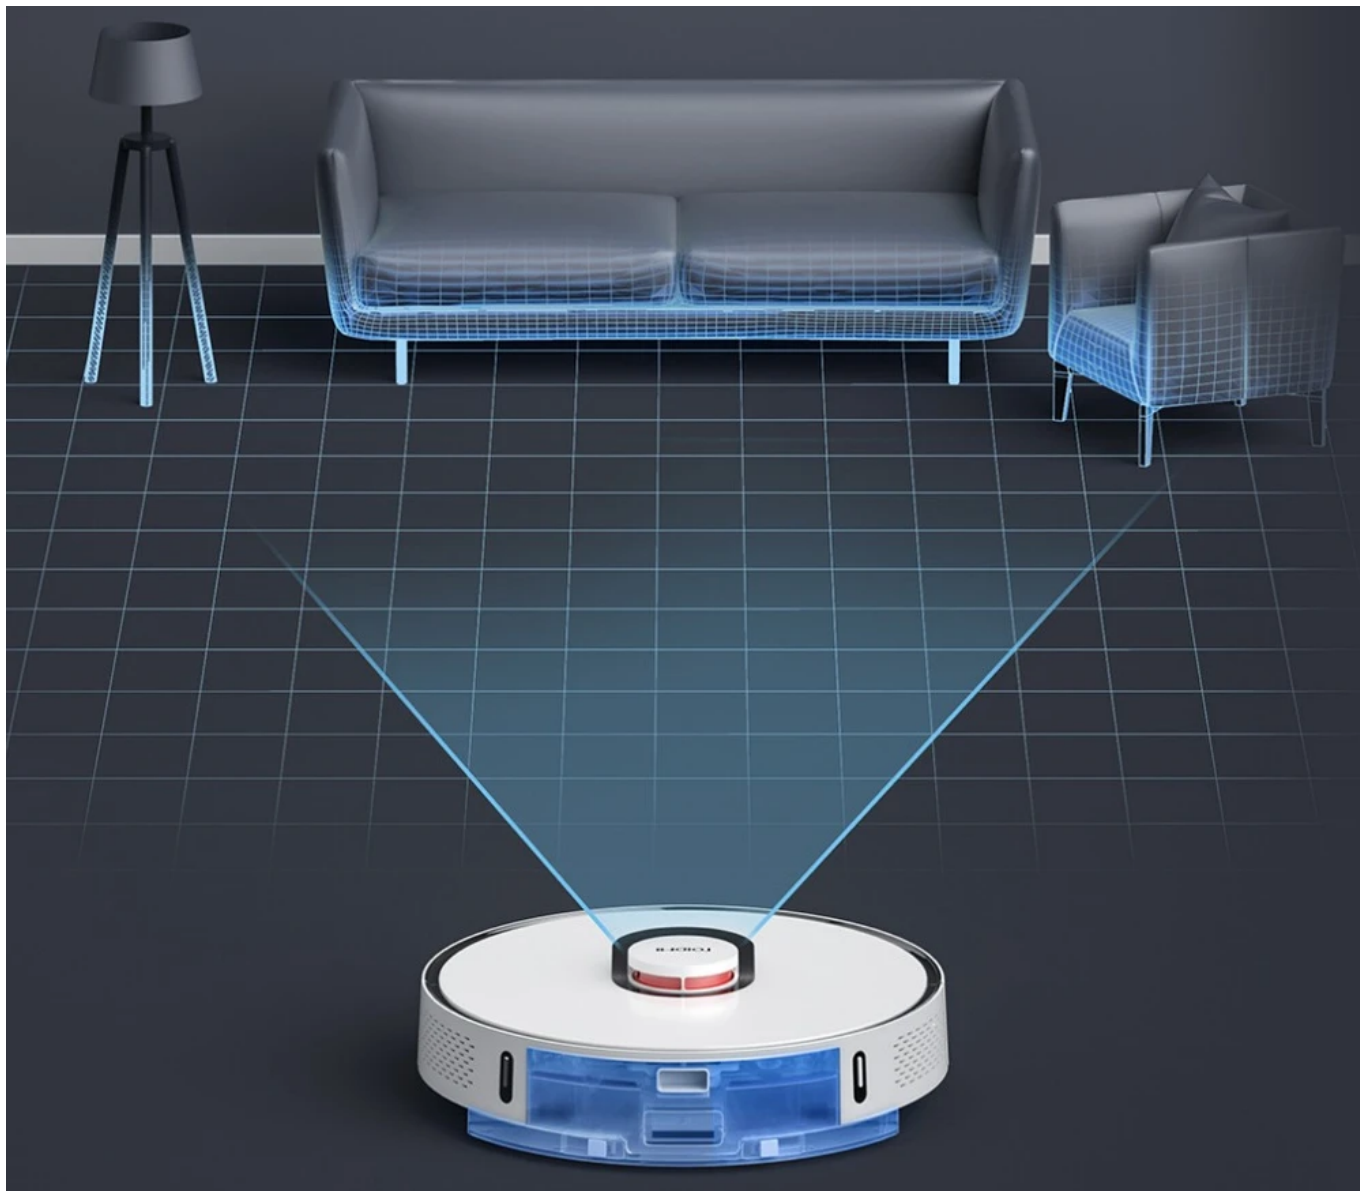

Roidmi EVE Plus - the next generation intelligent cleaning robot

The **Roidmi EVE Plus** is a cleaning robot with mop function, which thanks to its high suction power of **2700 Pa** and its array of sensors is ideal as a domestic vacuum cleaner. Its **powerful processor** quickly processes the sensor data with advanced algorithms to create an accurate map of your environment. The **Roidmi EVE Plus** can be remotely controlled from the **mobile app**.

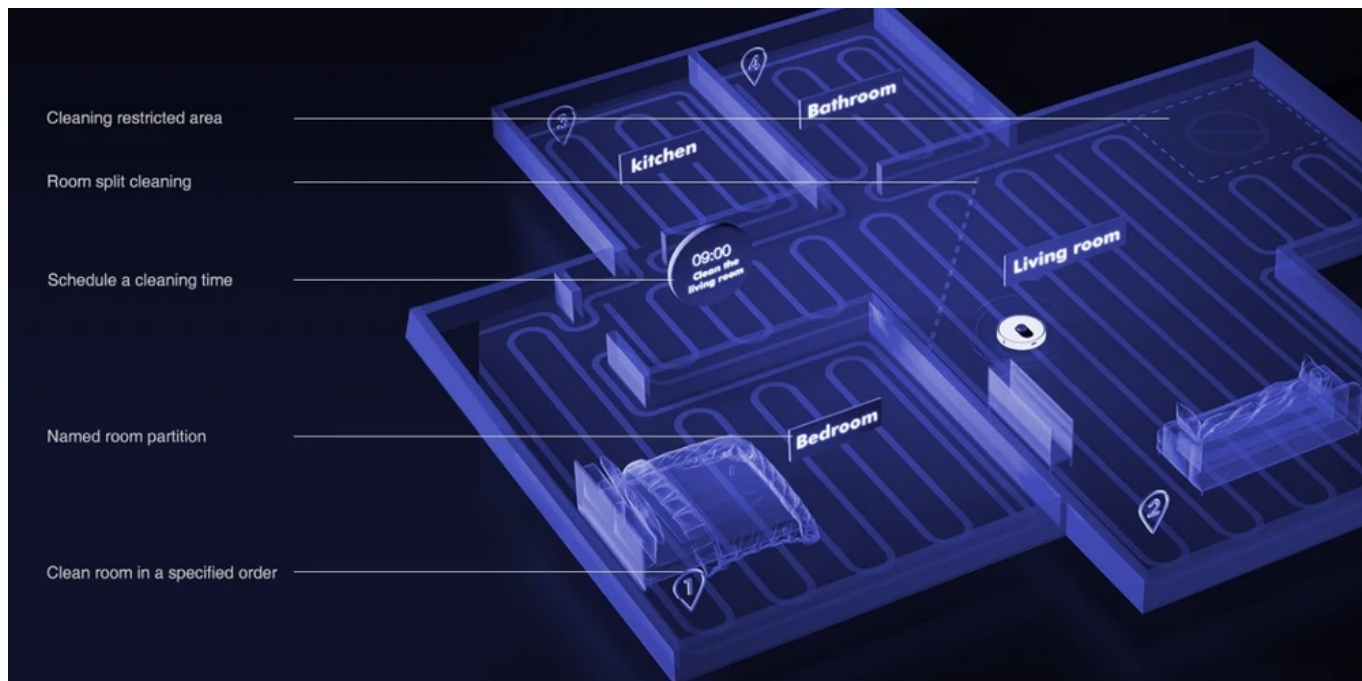

LDS 4th generation super-sensitive lidar for precise scanning and mapping

ROIDMI's 4th generation super-sensitive LDS lidar can quickly scan an entire house and automatically draw maps using the SLAM algorithm, with 40% higher accuracy than the previous generation.

Intelligent room division

With automatic artificial intelligence recognition, not only can you automatically save a zone map, but you can also combine, style and name zones to achieve cleaning in a set order or scheduled cleaning of a designated room.

Automatic resuming of cleaning

When your **Roidmi vacuum** cleaner has finished its cleaning or its battery is low, **it will automatically return to its charging base**. And if it hasn't done your cleaning plan yet, **Roidmi EVE Plus remembers where it left off**, so it can go back there and continue once the battery is charged.

18 different sensors to protect your device

The **18 sensors in the Xiaomi Roidmi EVE Plus** ensure safe cleaning for both the device and your furniture. For example, with the level sensor, **Roidmi EVE Plus** detects stairs and prevents falls. With the **LDS sensor** and anti-collision panel, it detects obstacles and avoids bumping into them. Moreover, small steps or unevenness are not a problem for it as it easily **overcomes obstacles up to 20 mm in height**.

Intelligent dust collection station

ROIDMI EVE Plus is not only a charging station, but also a smart dustbin. After cleaning, **it automatically empties the dust bin** is full. It also has original ozone **antibacterial and odor removing technology**.

Peace of mind for up to a month

With the **ROIDMI EVE Plus** robot, you can rest assured that your business travels. Even if you're away for a month, **EVE Plus** can clean your home every day.
